TA studio brief — Drafting a structured visual review

Pathway: SUMMIT · Week 7 Part 1 · Big question: How do we synthesise our exhibition field sketches and portfolio evidence into a structured critical review?

TA practical setup & focus

Provide pre-printed '[Fig. 1]' and '[Fig. 2]' callout stickers so pupils can cleanly cross-reference their Week 6 field sketches inside their written paragraphs.

Studio kit: Week 6 completed Gallery inquiry sheets, Weeks 1-4 portfolio boards, A3 Critical review presentation sheets, fineliners, mounting card, glue sticks

Key words to prompt

• critical review: A structured analytical evaluation of an exhibition or artwork backed by concrete visual and technical evidence.

• visual evidence: Specific details you observed and sketched (such as a 5-value contrast ratio, laminated relief depth, or raking light angle).

• thesis: Your central overarching argument about why the exhibition or artwork succeeds visually.

• synthesis: Bringing field sketches, technical terminology, and critical judgement together on one resolved page.

• portfolio audit: The final check ensuring all seven weeks of studio evidence are sequenced and annotated.

Supported route steps

1. Mount your best Week 6 sketch onto the '[Fig. 1]' box on your Critical review sheet.

2. Complete the four structured review boxes (1. What the exhibition showed, 2. How tone and texture worked, 3. How lighting helped, 4. What I learned for my own art).

3. Draw a pointer arrow from your writing to your sketch.

4. Put all your Weeks 1-7 sheets in order inside your portfolio wallet.

Check: Sketch mounted, four review sections completed with pointer arrow, and portfolio sequenced.

Review & exit support

Exit question: What are the three parts of the formula for a strong analytical sentence in an art review?

Staff note: Staff preparation only: review how to model cross-referencing observational gallery sketches inside a structured four-part critical review.
