Backbones and No Backbones · Pupil Resources

Learning goal: I can find a backbone on a diagram and sort animals with and without a backbone.

Arrival Questions (In your book)

1. Which box shows a bone row inside?
2. Does a fish have a backbone inside?
3. Where is a crab's hard case?
4. Can you ask an adult to help?

Starter Question

A crab feels hard, yet it has no bones inside. Why does it feel hard?

A. It has a hard case on the outside.

B. It has a long bone row inside.

C. It is made of rock.

Method Strip

1. Put the two sorting mats flat on your desk.
2. Look at the first animal card and find the inside clue. STOP AND CHECK with your adult.
3. Place the card on the Backbone mat or the No backbone mat.
4. Sort the rest of the cards one by one using the body clues.
5. Pick one animal and write or say why it belongs in that group.

Exit Ticket

Point to the animal with a backbone: worm or cat.

Name one animal with a backbone and give the clue you used.

How can an animal stay supported with no backbone inside?
