Muscle Model · TA Brief

Learning goal: I can test a card and string arm model to show how two muscles pull a joint.

Watch (staff preview first)

Short silent teacher demonstration clip for this lesson's model and practical sequence · preview before class use.

Adult Support Routine

No cold calling; nobody is asked to read difficult text aloud.

Give time to start -> point to the relevant place -> rephrase -> offer a small prompt or word bank -> reduce to a limited choice.

Beside the You do in the pupil book, mark I (independent), S (supported) or C (choice).

Must-Know Words

model: a simple copy we use to test how something works

hinge: a joint that bends and straightens like a door

string: the part in our model that acts like a muscle

card strip: the stiff part in our model that acts like a bone

Key Answers

A. Just like a muscle, a string can pull a bone, but it cannot push.

A. If both pull at once, they pull against each other and the joint stays stuck.

1. Muscle. 2. The lower card arm bent up. 3. A real muscle gets short and fat on its own without a hand pulling its end.
