Food Sources · Knowledge Organiser

Learning goal: I can say if a food comes from a plant or an animal and group animals by what they eat.

Today I Can

I can sort foods into plant source and animal source.

I can trace bread back to wheat and cheese back to milk.

I can sort animals into plant eaters, meat eaters, and eaters of both.

Must-Know Words

source: where something starts or comes from, like a plant or an animal

herbivore: an animal that eats only plants

carnivore: an animal that eats only other animals

omnivore: an animal that eats both plants and other animals

Core Science Steps

First, look past the shop packet. Bread comes from wheat plants, and chips come from potato plants.

Second, check animal sources: eggs come from hens, and dairy cheese comes from milk.

Third, group animals by what they eat: plants only (herbivore), meat only (carnivore), or both (omnivore).

Keep the Science Clear

Break a dish into its ingredients so you can name the plant source and the animal source clearly.

Never stop at 'the shop' or 'the factory' · trace the food all the way back to a living plant or animal.
