Staff answers and source guide

Prepared source set

Prepared teaching sources dated 30 October 2026. All posts and accounts are invented. They do not describe real vacancies, pay or entry rules.

Three contrasting cards per occupation: role guide, sample vacancy and worker account. They are all authored in this pack. Their different perspectives meet the owner's prepared-source instruction; they do not provide independent real-world corroboration.

Exact outcome: I can research two occupations from more than one source and identify similarities, differences and unanswered questions.

Stockroom profile

Field	Supported note and cards
Duties	Check goods, count and store items, read labels and log stock (A1/A2).
Hours	A2: 35 paid hours, weekday day shifts. A3: some weekends in a different post.
Salary range	A2: invented £26,000–£29,000 gross annually, before deductions, for 35 paid weekly hours.
Location or setting	Stock area with shelves (A1); one stock site (A2). No real location.
Entry	A1: basic reading/number skills then task training. A2: training for agreed tasks. No exact qualification stated.
Progression	A1: possible stock-record work or guiding a small team. No guaranteed next role.
Conditions	Standing, reaching and moving items with aids (A1); time on feet (A2); noise and agreed movement plan in one account (A3).

Useful open questions: exact shift start time; which aids are available; content and length of training. A named post description or purposeful question to someone responsible for that post would be a later source. Do not make contact during this lesson.

Reception profile and comparisons

Field	Supported note and cards
Duties	Greet visitors, check bookings, pass messages, keep records (B1/B2).
Hours	B2: 35 paid hours, weekday daytime. B3: some evenings in a different post.
Salary range	B2: invented £25,000–£28,000 gross annually, before deductions, for 35 paid weekly hours.
Location or setting	Front desk/shared office (B1); one front desk (B2). No real location.
Entry	B1: clear speech, reading, basic digital skills then system training. B2: training for agreed tasks. No exact qualification stated.
Progression	B1: possible admin tasks or guiding a desk team. No promised next role in B2.
Conditions	Mix of sitting and standing, switching tasks (B1); seat/standing to greet (B2); several questions at busy times (B3).

Valid comparisons

Similarity: both sample vacancies have 35 paid weekly hours and weekday daytime work (A2/B2); both role guides include keeping records (A1/B1). Difference: stockroom tasks focus on goods while reception tasks focus on visitors and bookings (A1/B1). Typical settings and sample pay ranges also differ, with scope stated.

If comparing pay: both are gross annual ranges for the same paid weekly hours. The ranges overlap from £26,000 to £28,000. It is unsupported to say every stockroom worker earns more than every reception worker. No pay calculation is needed.

Useful reception questions: exact start time; what training covers; which system is used; whether this particular post has any evening shifts. A question should identify a gap rather than repeat a point already stated.

Checks and source reasoning

Retrieval and model

Recall source label, date and a limit from the previous illustrative-data task. If missed, use “one sample vacancy describes one post”. After the model, expected answers are one post, and A1 for broad tasks or possible progression. A recent date alone is not a trust guarantee.

Reliable source check

Locate label/date/type/purpose. Decide what the source actually covers. Check a specific claim against another card and note gaps. The prepared cards deliberately give different views: general tasks, a particular offer and one person’s experience. Their consistency within this teaching set is checked; no external validation is claimed.

Main hinge

B is supported: A2 weekdays and A3 weekends describe different posts. Ask for both labels and the words that show scope. If insecure, re-model those words and use the parallel hinge.

Parallel hinge

B is supported: B2 weekday work and B3 evenings cannot justify one rule for all reception jobs. A useful next check is the exact shifts of the particular post. Retain supported work and record uncertainty if needed.

Misconceptions

Two cards do not automatically establish a universal fact. Their purpose, coverage and relationship matter. Different examples are not necessarily a contradiction. An unanswered question is useful when it identifies missing evidence. “Not stated” is preferable to an invented detail.

Floor and support

Floor key A, A, A, B, A, B. The choices check sources, one similarity, one difference and two gaps. They do not alone supply all profile fields. Keep actual responses and prompts. Accept alternatives supported by the cards. Read or scribe faithfully without supplying conclusions.

Evidence and feedback guide

Core evidence

J11 calls for two-job research profiles with source record. The exact outcome requires two occupations, more than one source, similarities, differences and unanswered questions. In this pack, collect at least two card labels for each occupation, one supported similarity, one important difference and one useful unanswered question per occupation. Record the seven profile fields from H11 or explicit gaps. The narrower M11 difference check is not proof of the complete outcome.

Examples of evidence

Secure: “A2 and B2 both give 35 paid hours. A1 handles goods; B1 greets visitors. A1/A2 and B1/B2 give my profiles. I still need the exact stock shift start and the reception training details.” Check that the profiles carry the seven fields or honest gaps. Partial: one job, one card for a job, an unreferenced comparison or missing questions. Unsupported: “All these jobs have the same hours”.

Precise next steps

“Add a second card for reception.” “Put the card label beside your hours claim.” “Name what differs about the tasks.” “Choose a question the cards leave open.” Give one next step, then retain the learner’s response.

Access and independence

Reader, scribe, typing and normal aids do not automatically reduce independence of thought. Record answer prompts separately. Fade prompts where secure, without removing access. No cold calling or compulsory public performance.

Portfolio and marking

Keep profiles, source record, first comparison, support, revision and next research action in the Careers Portfolio/action plan. Offer to the Communication portfolio. VF verbal feedback; WS supported; I independent; NS next step; // self-edit; ? read back; E actual banked evidence; R after Voice, Audience, NS and response in the same colour, on the same page or usual mode.

Fidelity boundary

Exact scheme outcome, sequence and routes retained. The owner’s prepared-card instruction replaces live research; generic work settings replace real locations. This records research practice within a teaching set, not verified information for an actual application. Week 3 formative; Week 6 mixed source assessment; Week 7 assessing.
