Two routes to baker

Prepared route guides, checked 30 October 2026. These are broad routes, not offers of a course or job. Exact entry rules and places must be checked.

A1 College course

Steps: 1. School; 2. Bakery or catering course; 3. Apply for trainee bakery work; 4. Build skills at work as a baker.

Entry: Course entry rules vary. Check which school qualifications, including English and maths, are asked for. No fixed grades are given here.

Learning: Learn to measure, follow a recipe and work safely with food. Complete the course tasks and checks for its qualification. Check the course level.

Experience: Practical course tasks build experience. A work placement may help, if offered. The course does not promise a job.

Later: With experience and further training, a baker could move into a team lead role. A move into bakery sales uses some related skills.

Check: What are the course entry rules, level and work practice options?

A2 Apprenticeship

Steps: 1. School; 2. Apply for a baker apprenticeship; 3. Learn at work and in training; 4. Complete the training and skills checks.

Entry: Apply for an available place. The employer sets entry needs. English and maths qualifications, or equivalents, may be asked for. Check the exact rules.

Learning: A Level 2 baker apprenticeship is one route. Develop baking, measuring, food safety and team skills. Show these skills in the required checks.

Experience: Work is part of this route, alongside training. You learn in the job. Prior paid bakery work is not stated as a fixed rule in this guide.

Later: After training, seek a baker role or more training. A later team lead role needs further skill and experience. Continued work is not promised.

Check: What entry skills are needed, and how are work and training arranged?

Two routes to admin assistant

Prepared route guides, checked 30 October 2026. These are broad routes, not offers of a course or job. Exact entry rules and places must be checked.

B1 College course

Steps: 1. School; 2. Business and admin course; 3. Apply for an admin job; 4. Build skills through work and training.

Entry: Course entry rules vary. Check the school qualifications and English or maths needed. This guide does not give fixed grades.

Learning: Build skills in writing clear messages, keeping records and using office software. Complete course work and checks. Check its qualification and level.

Experience: Course tasks can show office skills. An agreed office placement or volunteer role may add experience. It is not a fixed entry rule here.

Later: With experience, an admin assistant could seek a team lead role. A move to another office team may need extra training.

Check: What are the entry rules, course level and chances to practise office tasks?

B2 Apprenticeship

Steps: 1. School; 2. Apply for an admin apprenticeship; 3. Learn at work and in training; 4. Complete the training and skills checks.

Entry: Apply for an available place. Entry needs depend on the employer and level. Check school qualifications, English, maths and any skills test.

Learning: A Level 3 business administration apprenticeship is one route. Develop clear communication, accurate records, office software and planning skills. Complete the required checks.

Experience: Work tasks and training build office experience. Show what you can do as you learn. This guide does not set a fixed amount of prior paid work.

Later: After training, seek an admin role or further training. With experience, a team lead role or a move to another office team may be possible.

Check: What entry needs apply to this level, and what support is available?

A model and your route map

A1 model for baker

First: school. Next: a bakery or catering course. Then: apply for trainee bakery work. Build skills at work as a baker.

On this route I learn to measure and work safely with food. I must check the course entry rules and level. A course place does not promise a job.

Your task in your book

Choose baker with A1/A2, or admin assistant with B1/B2. Keep the same career at the end of both routes.

For each route, show steps in order. Add a qualification, experience or skill it needs. Mark each point: needed at entry, learned on the route, or still to check. Keep the card label beside your point.

Add one possible later step and one sideways move. These may need more training. Keep a useful question. Your task choice is not a final job choice.

Other routes and moves

After school, a college course, a sixth form, work with training or an apprenticeship may be options. Further study, including higher education, can follow some routes. Check the needs of the chosen job and course. A degree is not required for every career.

Progression can mean more skill or responsibility. A sideways move uses skills in a related role. For example, a baker might move into bakery sales after more learning.

Read, point, speak, write, type or use a scribe. Plan in any language. Keep your first view and any change.

Floor choices and short frames

Use A1 and A2 with the cards in view. An adult may read and record your own choices.

Check	Choices
Same career	A: Both routes lead towards baker. B: The routes must end in two different careers.
A1 order	A: Course, then apply for bakery work. B: A guaranteed job, then a course.
A2 route	A: Work without any training. B: Work and training together.
A1 skill	A: Measuring and safe food work develop on the course. B: No skills are needed.
Entry needs	A: Every course has the same grades. B: Check the exact entry rules.
Later move	A: A baker may seek a team lead role with more skill and experience. B: Promotion is automatic.

My two routes

“My career is ... . Route one is ... . First ... . Next ... . Route two is ... . First ... . Next ... .”

“For route ... , I need to learn ... . At entry, I would check ... .”

Order both routes and show a need for each. A choice on its own is not a full map. You may explain your map in private.

Adult key for the choices

Keep this page apart from first choices. Record the learner’s answers before giving the key.

Check	Answer and reason
Same career	A: Two distinct routes can lead towards baker.
A1 order	A: Course, then application for trainee bakery work.
A2 route	B: Work combines with training.
A1 skill	A: Measuring and food safety develop during the route.
Entry needs	B: Exact entry rules vary and need checking.
Later move	A: Further skill and experience may lead to more responsibility.

Floor key A, A, B, A, B, A. Ask for the card clue. Also gather an ordered A2 branch and a skill or qualification it needs. Choices alone do not prove the full outcome.

Keep normal access separate from answers supplied. Record a missing route, skill or sequence as partial. A later move is possible, not promised. The same job choice can have more than one sensible route.
