Staff answers and session guide

Outcome and source

I can ask a purposeful question, record recruitment/entry information and evaluate one route against my own needs.

E14 meaningful provider encounter, H14 preparation/two-way questions/immediate evaluation, J14 log and next question, M14 meaningful two-way enquiry, N14 F + S. I14 is a flexible window; it does not give the earlier fixed phase timings. The 40-minute example is 5/5/20/7/3.

Mode decisions

Mode	Valid record	Boundary
Visitor	Learner question/relay, provider reply, follow-up, entry facts and own-needs evaluation.	Record actual interaction; do not infer attendance or entitlement from the plan.
Recorded talk	Attributable information, prepared questions, actual provider response if later arranged.	Playback or classroom discussion alone does not show provider two-way interaction.
Profile fallback	Adult role-play answer from A/B, accurate source label, own-needs evaluation of example.	Simulated skill evidence only; real encounter check remains not yet.

Preparation brief

Agree the enquiry, learning outcome, six topics, question methods and access before an actual event. Preview recording/captions/transcript. Allow reasonable time during the school day; extend or separate the encounter window if needed. Evaluate immediately afterwards. If nothing is available, teach the complete simulation.

Question purpose

A useful question seeks information that could affect an enquiry: entry task, teaching pattern, assessment, support, employer link or next step. “Is it good?” is too broad unless followed by a specific question. The learner may write or relay their own words.

Profile facts and sample evaluations

Practice profiles prepared 30 October 2026. These are invented teaching examples, not real providers, places or entry rules.

Field	A technical course	B office apprenticeship
Content and level	Practical making/repair; Level 2 example.	Office messages, records and planning; Level 3 example.
Week	Three workshop and two classroom days.	Four work and one training day.
Recruitment	Application, course discussion, short reading/measuring task.	Vacancy application, interview, short office task.
Entry gap	Exact grades/equivalents and age rule not stated.	Exact grades/equivalents, English/maths and age rules not stated.
Support	Written steps, weekly tutor check-in; other support to discuss.	Weekly supervisor check-in; training support/adjustments to confirm.
Next step	Further study, apprenticeship or trainee work, with new entry checks.	Seek admin work or training; no continued job promise.

Examples of reasoning

If the learner genuinely needs practical learning: A could fit because three workshop days are described, but the exact tasks and travel need checking. If they need written steps: A offers them in the example; ask how a real course would agree support. If they want work with training: B could fit, but exact hours, support and entry rules remain open.

“Does not fit yet” and “unsure” can be valid with evidence. Do not assume an own need from a diagnosis, task behaviour or copied model. A stated fact plus the learner’s own reason matters more than a positive answer. Sample weeks total five days each, not a general rule.

Checks and misconceptions

After the model

The specific entry-task question is more purposeful than “Is this good?” Unknown support or entry detail is not a promise. Ask for the profile/source clue and preserve gaps.

Main hinge

B: entry grades not stated should be recorded as not stated with a question. If insecure, model known versus guessed versus missing, then use the parallel hinge.

Parallel hinge

B: recording used, provider reply pending. A talk viewed without provider response does not establish two-way interaction. A teacher’s profile reply is simulated even when the learner asks a good question.

Floor

Key A, A, B, A, B, A. Choices alone are insufficient. Gather the actual asked/relayed question, purpose, recruitment/entry facts or stated gaps, own need and evaluation with next question. Distinguish reader/scribe access from answers supplied.

Misconceptions

A prepared question is not yet asked. “Not stated” is accurate only where the source is silent; do not use it instead of listening to a given answer. Offered support does not establish all adjustments. Entry selection is not guaranteed admission. A positive fit judgement is not proof of eligibility. Hypothetical needs and simulated sources must remain labelled.

Privacy and participation

No forced public sharing, personal grades, health, family employment or income. An own need can be a general learning preference, offered privately. A learner can pause and return, use normal aids or ask via an adult. Preserve the learner’s thought and the actual reply.

Evidence and next steps

Core outcome evidence

Question has a clear purpose and is actually asked or relayed. Record recruitment/entry information accurately, including genuine gaps. Evaluate one route against an own need using a source detail, a fit/concern/uncertainty judgement and a reason. Keep a next question. Track actual source/mode so rehearsal is not presented as real provider engagement.

Secure and partial evidence

Secure skill example in fallback: learner asks an entry-task question, records A's application/discussion/task and missing grades, states an own need for written steps, links A's support to that need and asks how real support would be agreed. Log it simulated. The real encounter end check is still not yet.

Partial: question written but not asked; guessed grades; no recruitment/entry record; "good" without evidence; copied or hypothetical need presented as own; or simulation logged as a visitor. Separate the missing component from what the learner did demonstrate.

Precise next steps

"Ask or relay the question you prepared." "Add the selection step the source gave." "Keep the missing grade as a question." "Link one detail to your own need." "Explain why you are unsure." Set one next step and retain the response.

Source end check and entitlement

M14 asks whether the encounter was meaningful, two-way and linked to a real decision/enquiry. Actual provider participation and accessible response opportunity must be evidenced. Track year-group entitlement and source timing requirements separately through responsible staff. No lesson sheet certifies compliance. Recorded-only and simulated modes remain preparation or skill practice until a real encounter is established.

Portfolio and feedback

N14 F + S retained: formative preparation with recorded evaluation evidence. Week 7 assessing. Retain log, source/mode, question status, needs type, actual support and revision. Offer to the Communication portfolio. E for actual banked evidence; R after Voice, Audience, NS and response in the same colour, on the same page or usual mode. Any accredited mapping requires staff confirmation from actual work.
