My place, the UK and the wider world

Objective: Locate my place the UK and the wider world on maps.

locate

find and show a place

scale

the relationship between map distance and real distance

locality

the area around a place

country

an area with its own government; the UK is a country made up of four countries

continent

one of Earth's large land regions

compare

say what is similar and different

Natural Earth public-domain land outlines. Simplified equirectangular view; north up. Marker = UK. Country boundaries and small islands are omitted. This is a location aid, not a navigation map.

Remember: Europe is not the EU, and the UK is not a continent. This lesson locates geographical places; membership of a political organisation is a different question.

Show learning: Locate the UK in Europe on a world map.

World of work: A town planner uses maps at different scales to connect a local site with a region. Choose the map view that would help plan a local visit.
