Staff answers and teaching notes

Exact lesson outcome

I can name at least three next-step options: college/sixth form, apprenticeship/training and employment with training/support.

Three groups

1 College/sixth form; 2 apprenticeship/training; 3 employment with training/support. The assessment asks for coverage of all three broad groups, not three labels from the same group. Accept accessible equivalent words that preserve the distinction. Learners may select a label with their usual aid; record how it was identified.

Definitions

A college may offer further education, including subjects or job skills. A sixth form offers courses after school, within a school or college. An apprenticeship combines a paid job with planned learning. A training course teaches skills but may not include a paid job. An independent training provider is a generic type of organisation teaching job skills; it can deliver training and is not an additional fourth route group. Employment with training/support means a job with learning or help in place. Actual routes overlap and vary; this introductory grid is not a complete taxonomy or an eligibility judgement.

Retrieval and model

Retrieve Week 1: work plans can change, and learning a skill or asking for help may support a next step. Model A: group 1, learn. Explain the course and no-paid-job clues. Model check A learn versus B both: key A.

Guided examples and hinge

C: group 2, both, because a paid apprenticeship includes planned learning. D: group 2, learn, because this training course has no paid job. Main hinge B: not every training course has a paid job; check details. Parallel A: C is both. Re-model C/D privately if unclear, then recheck. A pass is unobserved.

Task answers and feedback

Options grid

The completed grid identifies all three groups. Example B matches group 1, learn; it describes sixth form study and no paid job. E matches group 3, both; it describes a paid job, training and help. Group 2 must still be named even though B and E match the other groups. Either C or D can be offered as its example.

Missing information F

F gives pay only, so the information sort is earn. It gives no basis for deciding what learning/support is available. Ask what training or help comes with the job. Do not infer none, count F as a full supported-employment route, or present earn alone as a complete recommendation. The sort concerns the text of the card, not a judgement about every real route.

Two choices

Whole grid: all three option cards with B and E. One row at a time: B with labels 1/2; E with 2/3; then remaining group 2 with 1/2. Return the full set and check all three distinct groups. Record offered labels, fixed choices and supplied answers separately from usual communication access.

Private choice check

Offer one option to find out more about, not sure, pass or choice for an invented person. Do not ask for a public reason or family plans. Mark neither the preference nor the decision to pass. It is a tentative enquiry, not a destination decision.

Review and next step

Check naming and sorting separately. Useful NS: add the missing group; include training/support with the job; or show the paid-job and learning clues. Retain the first response and reply. Exit checks all three labels using speech, pointing or the usual aid. No hierarchy of route worth.

Evidence and safe delivery

Assessment record

Exact evidence: Post-16 options grid. Secure core naming covers all three groups. Record B/E matches and sorts separately; retain partial evidence. Record actual cues, modelled answers, first attempt, one NS and reply. A no-response or pass is unobserved. Do not mark an optional preference or infer readiness for a real application.

Typed and scribed route

Evidence Sheet page 2 has blank option fields, B/E fields, clue, optional choice and NS/reply. Either task route can be typed. Save with the usual routine, lesson code and work reference; share privately. Exact scribe reads back and allows correction. No online system needed.

Feedback and portfolio

E is actual banked work. R follows Voice, Audience, one NS and the learner’s reply. Add the grid to Careers Portfolio; offer to the Communication portfolio. Staff confirm any accredited mapping from actual work.

Private help and boundaries

Use a trusted adult or the school’s help route. Point to HELP, write or ask for a private talk. Pass, supported pause/return and usual aids remain available. No real family finances, job histories or public plans requested. Listen calmly to concerns, avoid probing and secrecy promises and follow normal procedures. Keep concerns outside shared work.

Source and limits

BUILD Careers physical row 17 / Spring 1 row 2. Tuesday 12 January 2027 P3. Up to five learners; 40 minutes in 5/8/10/12/5 phases. Examples are invented and generic, replacing local examples. No named provider or actual fees, wages, entry grades or availability. Staff check age, entry and ongoing learning requirements through the usual advice route before a real decision.

Queue

Next BUILD Careers Weeks 3–6, one per return; then the previously queued LAUNCH Careers Week 1. No further GROW Careers until asked. Only Week 2 authored. Pause for Downloaded.
