Explore — Festival light patterns

Today I can… ☐ find light shapes. ☐ find bright colours on dark paper. ☐ choose shapes and colours for my art.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

STAFF ANSWERS · Arrival

Supported

1. Dot: The filled round spot; accept a point, selected card or clear description.
2. Ring: The round line with an empty middle.
3. Rays: The three light blue rays above any one lamp sign in Example B.
4. My art: A dot or a ring; either is valid. Record the pupil's own choice in any response mode.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Arrival

Standard

1. Dot and ring: Any yellow dot and any pink ring in Example A.
2. What comes next: A pink ring.
3. Lamps: The same lamp sign: a yellow oval outline with three light blue rays.
4. My art: Any two of the supplied colours; record the pupil's own choices in any response mode.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Arrival

Stretch

1. Filled or empty: A dot is filled; a ring has an empty middle.

2. The bit again: Yellow dot followed by pink ring; the pair repeats three times. Accept indication of one pair and where it returns.

3. Lamps: The yellow oval, three light blue rays and their arrangement stay the same. One accurate shared feature is sufficient.

4. A new choice: Yes. A consistently repeated blue-dot/pink-ring pair would keep the shape order while changing one colour. Accept another clear example.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Exit ticket

Supported

1. Pattern: Dot, ring, dot, ring; pointing to it is valid.
2. Bright: Dark paper; describe and note any visual access issue rather than infer an error from it.
3. Choice: Any selected bright colour from the pupil's plan. Note the choice; it does not alone demonstrate a reason.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Exit ticket

Standard

1. Pattern: Marks put in an order; showing a repeated pair is valid.
2. Repeat: Use the same bit again; pointing out both occurrences is valid.
3. Choice: The pupil identifies their chosen shape(s) and two or three colours. Accept an adult-recorded plan as a prompt, noting the help used.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Exit ticket

Stretch

1. Same and not: Both use bright marks on dark paper, place marks in a row, use two colours, or repeat a unit. Accept one accurate shared feature.

2. My reason: Any reason linked to the colours standing out on dark paper, or another clear art reason; record the pupil's own words.

3. Two views: No. Different bright colour choices can work on dark paper; pupils can explain or show a choice without a single prescribed preference.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · teaching and routes

Starter: Dark. The yellow dot stands out more from the dark paper; it is closer in colour to the pale yellow paper. Record the pupil's actual response if their visual access or the materials change what they can distinguish.

I do: Yellow dot followed by pink ring. Accept pointing to the two cards in order, a gesture, symbols or own words.

We do: Yellow dot, then pink ring. Model finding the first pair, then invite every pupil to choose the next pair before filling the shared space.

We do: One chosen shape in a two- or three-colour unit, with that unit shown twice in the same order. Other intentional repeated shape arrangements are valid. Check that the pupil identifies their own repeat unit and colour choices; exact spacing and neatness are not the learning goal.

You do · Independent: The pupil identifies a repeat in A or B and makes a plan with chosen shape(s) and two or three bright colours. Their trial shows a complete unit twice in the same order. Accept arranged cards, marks or an adult-recorded sequence directed by the pupil. A pupil noticing and correcting a mismatch shows useful understanding.

You do · Supported: A pupil-chosen shape and two chosen bright colours, arranged as a pair and repeated in the same colour order. The pupil identifies both occurrences of the pair. Do not make the choices on the pupil's behalf; record any support used.

You do · Choice: A pupil-owned shape choice and two or three colour choices used in a repeated unit on a dark ground. The pupil identifies a visible bright mark. A selected shape alone is not the complete response; invite the colour and repeat choices in any mode. Different plans can work.

You do · Aspire: Two short trials retain the dot/ring shape order and repeat it. The second trial swaps the first trial's two colours between the shapes; for example, yellow dot/pink ring becomes pink dot/yellow ring. The pupil identifies the unchanged shape order, changed placement of colours and preferred plan, including a colour that stands out against the dark ground. Retain one two-colour plan.

Staff: mark I, S or C beside the You do response for actual independence, support or choice.
