Map symbols and grid references

Today I can… ☐ identify features using the key. ☐ give a four-figure grid reference and direction. ☐ explain what a reference shows and what it leaves out.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

STAFF ANSWERS · Arrival

Supported

1. A settlement: A town; a settlement is a place where people live.
2. A symbol: Post office.
3. A direction: Up.
4. A grid order: 10–14. These label the eastings.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Arrival

Standard

1. A settlement: A place where people live, such as a village or town.
2. A symbol: Sch — school; FB — footbridge.
3. A direction: North; the library is directly above the school on this north-up map.
4. A grid order: 10–14 run along the bottom; 20–24 run up the side.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Arrival

Stretch

1. A settlement: A village usually has fewer people or a smaller range of services than a city. Accept one accurate difference, expressed as a general pattern rather than a rule without exceptions.
2. A symbol: PO — post office; Sch — school.
3. A direction: South-west; the school is one square left and one square down on a north-up map.
4. A grid order: 10–14 run along the bottom; 20–24 run up the side.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Exit ticket

Standard

1. Symbol: Post office; this map's key.
2. Reference: 1121.
3. Precision: They can lie in the same whole grid square; the reference does not pick out one exact feature.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Exit ticket

Stretch

1. Symbol: Meanings can vary; this key verifies the intended feature.
2. Reference: 122214.
3. Precision: They locate a smaller 100 m square within the 1 km square, helping distinguish the post office from the health centre; they still have finite precision.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · teaching and routes

Starter: A. On this practice map Q7 marks the park reference point; Q9 marks the health centre. Sharing a first letter does not make two symbols mean the same thing; the key defines each symbol.

I do: Library; 10 then 21 → 1021. Accept directed tracing, digit cards or another clear response.

We do: Hall; 11 + 21 → 1121. Invite pupils to correct the order after the guided check.

We do: 1 School, 1020. 2 Post office, 1221. 3 Footbridge, 1122. 4 East. 5 Yes; both lie between eastings 12 and 13 and northings 21 and 22, so both are in 1221. A point to those bounding lines is valid evidence. Explain that sharing a square does not mean sharing one exact point.

You do · Independent: 1 Sch school; PO post office; FB footbridge. 2 School 1020; post office 1221; footbridge 1122. 3 East. 4 Both features occupy the same 1 km square, while a four-figure reference names the square, not an exact feature. 5 No population count, density, occupancy or change over time is supplied. Do not infer population growth or urbanisation from selected service symbols alone. An accurate limitation with a reason is sufficient.

You do · Supported: 1 Post office; footbridge. 2 Left 10, bottom 20, reference 1020. 3 1221. 4 1122. 5 East. 6 Whole square; PO and Q9 are different dots in the same square. Vary the spatial order of option cards and record the actual content support, not just the route name.

You do · Choice: 1 Sch school; PO post office; FB footbridge. 2 School 1020; post office 1221; footbridge 1122. 3 School uses 10/20; post office 12/21; footbridge 11/22. 4 East. 5 A; both PO and Q9 appear in 1221. Require the pupil's own selected match and evidence, not an adult-completed card arrangement. Record C, the response mode chosen, the pupil's one map clue from task 5, and the actual prompts.

STAFF ANSWERS · teaching and routes

You do · Aspire: 1 Sch school 1020; PO post office 1221; FB footbridge 1122. 2 PO 122214: two tenths east of 12, four tenths north of 21. Health centre 128217: eight tenths east of 12, seven tenths north of 21. 3 Both share 1221 at four figures; six figures distinguish smaller 100 m squares within that 1 km square. Six figures are more precise, not an infinitely exact point. 4 East. 5 Claim unsupported: this invented snapshot contains no population counts or time comparison. Urbanisation concerns the share of people in urban places; dated comparable population data and a consistent urban definition would be needed. If the pupil instead discusses physical urban expansion, accept dated comparable land-use maps for that narrower claim, while distinguishing it from population-share urbanisation.

Staff: mark I, S or C beside the You do response for actual independence, support or choice.
