Starter and method strip

Starter

Question: Does “I hope this improves” mean “I know it will improve”?

In your book: One brief choice or response.

Method

Worked method model

A describes a Christian belief: the central teacher rose from death. The account links this belief with hope.

I report the belief as the source’s claim. I do not ask a pupil to agree with it.

The account urges care for people in need. Hope and caring action can go together while hardship remains.

In your book: Keep one useful model note or word meaning. Mark it as model, not your own evidence.

Feedback codes

VF means spoken feedback. WS means worked with support. I means independent.

NS means one next step. E means evidence kept on the evidence app.

R means responded: an adult heard the response and it shaped the next step.

// marks a self-edit point. ? means read this back to me. You may show or sign your meaning.

Choose from the options, then add your own word, phrase or reason.

Core task: Explain how one faith account links hardship and hope.

Choose the claim A supports: faith can be a source of hope / faith makes all pain stop at once / every person must believe the same thing.

Choose an action in C and give your own reason linking it to care.

State what the source cannot promise.

Use the four must-know words in labels, talk or your review: suffering, hope, faith, response.

Help: Find the card named in the task. Read one short part. Point to a detail, then make your own choice.

Source and check

This is one Christian account of hope, not every believer's view.

The source links faith with hope and care for people in need.

A belief-based hope is not proof that a hard situation has ended.

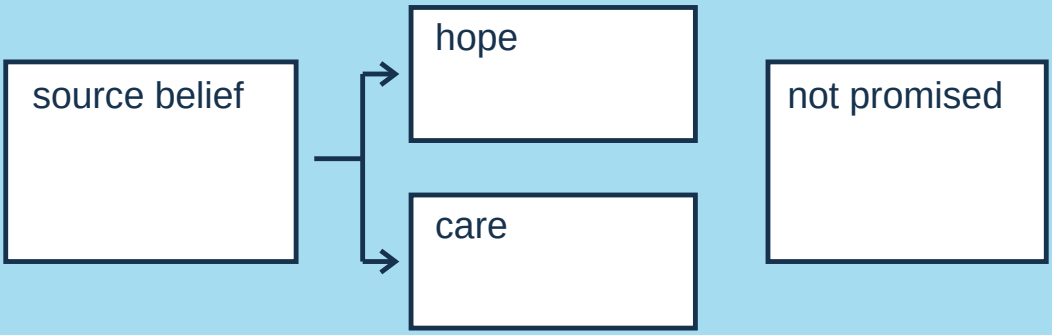

Use the supplied third-person sources. No personal belief or loss story is needed. You may use the neutral case to explain a source idea, or pass.

A source-belief box links to hope and care boxes. A separate blank box is labelled not promised. No religious figure is drawn.

Record what the helper could do, then explain how it fits the caring idea in A.

In your book: One guided record and your own source detail, choice or starting step.

Card A — G-P-S5; one Christian account, in new words

This Christian account links hope to belief in the central teacher rising from death. It urges care and kindness for people in need. Some Christians draw hope from this belief. It does not mean that pain or hard change must end at once.

Case C — invented neutral community case

A shared room is closed for repairs. A group cannot hold its planned meal there. A helper hopes people can still meet, but cannot promise a place. The group can check another room and ask what help is needed. No one is asked to forgive, pray or share a loss.

Recall after first try

Keep covered until after the first try.

R1: Beliefs or values can guide a response. The Christian source linked hope with care; the humanist source used reason, evidence and care.

R2: In the garden case, safe help, checks of needs and a new plan could help. None promised a fixed garden.

R3: A kind action does not establish a personal worldview. The case did not state one. Hope and a known result are different.

60-second recap: Beliefs or values can guide responses. Our garden case used facts, care and help. A kind act does not prove a person's worldview or guarantee a result.
