Sequence and evidence guide

Design and Technology LAUNCH Spring 1 Week 1 Thursday 7 January 2027 P1 Year A

Design and Technology LAUNCH Spring 1 Week 1. Resilience & Change. Use the dated cover plan first. School and Public contain the same generic teaching content.

Design make evaluate

Weeks 1–3 focus on food. This week designs and costs a balanced meal. The chosen two- or three-step dish is prepared safely in Week 2 and evaluated in Week 3. Weeks 4–6 focus on textiles, ending with the assessing week. Only Week 1 is included in this return.

Evidence to retain

The pupil’s completed meal plan, ingredient amounts and cost, total within £2.00, and one-line justification. Keep real dates, support and book page. A verbal or signed plan can be scribed with pupil confirmation.

Book first

Pupil pages are prompts to use in the book. Choose one tier: Supported, Standard or Stretch, following the current brief. Type instead stays closed until chosen. Save my responses downloads a local text file and does not send it anywhere.

Practical preparation

Keep the recipe and safety card ready for next week. Adult approval depends on actual ingredients, labels, dietary and access needs, equipment, storage and supervision. A pupil may meet the planning outcome while approval is pending.

Fallback

Without food, equipment, printer or paper, read the price rows aloud. Pupils speak, sign or direct their ingredient choices. Rehearse the three steps with empty hands. An adult records exact choices, total and reason when a recording method is available. Mark transcription pending until it exists. This is planning or simulation, never a claim that the meal was prepared.

Using the portable lesson

Design and Technology LAUNCH Spring 1 Week 1 Thursday 7 January 2027 P1 Year A

Resources

Keep the assets folder beside the HTML. Use the editable slide deck or offline HTML for teaching. PDF copies provide the checked print route. Each teaching document has a matching editable document and PDF. The slide deck also has a PDF print copy.

Food and cost context

All prices are invented for this lesson. Each price covers the stated amount for one person. These are ingredient-use costs, not the cost of buying whole packs. No spending or shopping is required. Water is available at no charge in this classroom model.

The model uses a ready-to-eat bean and vegetable wrap, fruit and plain yoghurt. Its listed ingredients cost £1.40, leaving 60p. The quantities are planning examples; needs and appetite vary. No nutritional adequacy claim is made for every learner.

Checks and source basis

Generic teaching guidance was checked against current public nutrition and food safety guidance on 30 October 2026. The teaching text is written in original words. No external pages, addresses or named suppliers are included. The exact scheme outcome is retained verbatim.

Planning and evidence

The adult model illustrates reasoning. The pupil supplies their own choices and explanation. Record practical work, tasting or approval only when it happens. Review any unresolved check before Week 2.

Where this leads

Food designers and catering teams balance cost, nutrition, access and safe preparation. A clear plan helps another person prepare the intended meal.
