Cold assembly without a kitchen

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

The planned meal is already a no-heat dish. This route removes pupil knife and grater use by supplying prepared vegetables.

Adult approval first

Approve the actual food, individual records, labels, hygiene facilities, clean equipment and cold storage. A room without a kitchen still needs potable handwashing water, suitable cleaning and a food-safe work surface. A checked cold container must maintain 0–5°C. If any condition fails, use simulation.

The agreed cold assembly dish

Use the pupil's checked bean and vegetable wrap plan. An adult supplies washed, pre-cut vegetables, washed fruit and cooked ready-to-eat beans. Use a fork, bowl and clean surface. Keep the same approved ingredient amounts.

1 Prepare the clean station and wash and dry hands. Use the adult-prepared produce.

2 Mash the beans. Mix in about 20 g from the single 60 g yoghurt portion and add the vegetables.

3 Fill and fold the wrap. Serve fruit and remaining yoghurt. Follow the adult's storage and cleaning decision.

No safe facilities or materials

With no safe food facilities, food or equipment, rehearse with empty hands or pictures. The pupil explains or directs the three steps and names a safety action at each point. Record this as planning or simulation, not preparation. Mark the practical and any plate photo pending. Rebook the practical when the adult can meet all safety requirements.

Record the actual route

In your book: cold assembly / simulation ___. Actions I completed ___. Adult actions ___. Safe checks observed ___. Plate photo actual location / pending ___. No tasting or photo is invented.
