Staff answers and checks

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

Evidence sort

A folded wrap visible in the actual photo is appearance. A dated note of mild flavour can support taste. No recorded taste means taste not assessed.

Model arithmetic

35 + 30 + 15 + 10 + 20 + 30 = 140p. One model portion is £1.40, leaving 60p from £2.00. Apple to pear: 140 - 30 + 35 = 145p, leaving 55p. Two-portion batch 280p divided by 2 = 140p per portion.

Nutrition

Wrap is starchy food; beans provide protein and fibre; carrot, cabbage and apple are vegetables and fruit; yoghurt is dairy. The 60 g yoghurt is charged once. Balance is over the day or week; do not treat this model as every teenager’s full nutrition target.

Hinge and response

Correct hinge answer is taste not assessed. If any pupil chooses another answer, stop the claim, separate the evidence types and reteach. Parallel check: a £2.80 batch made two portions. Cost per portion is £1.40, not £2.80 or 70p. A quiz answer does not supply missing evidence.

Cold call with a choice of response

Foundation: Which record could show how the wrap looked? Middle: Why is £1.40 not divided again? Higher: What does the invented price model leave out when judging a recipe?

Misconceptions and support

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

A photo proves taste.

It shows appearance. Use a recorded taste note or mark taste not assessed.

Divide £1.40 by two because two pupils are present.

£1.40 is already the model cost for one portion. Divide only a whole batch cost by its actual portion count.

A balanced review must say the dish was perfect.

It can name a useful strength, a limit and one improvement. Balance builds across the day or week.

An adult model can fill a missing pupil record.

Label the model as practice and keep the pupil’s actual evaluation pending.

A good improvement

The pupil names a real finding or limit and proposes a useful change with a reason. A cost comparison or better evidence recording is valid. A new taste result cannot be claimed before a future cleared activity.

Materials free route

With no prior food record, make an honest gap record. Review the clearly labelled adult cost model for practice and keep the pupil’s actual dish evaluation pending. With no paper or device, give an oral or signed review and have an adult record exact confirmed words when possible. Mark transcription pending until it exists. No kitchen, food or tasting is needed.
