Choosing fabric knowledge organiser

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Weekly outcome verbatim: TEXTILES: choose fabric and technique for a purpose.

I can choose fabric and a joining method for a pouch and explain how they suit its job.

Today I can

[ ] I can link a fabric property to the pouch purpose.

[ ] I can compare joining methods and choose one.

[ ] I can record my own choice and a reason for next week.

The job

Design a small reusable pouch for three paper prompt cards. Each card is 60 mm wide and 80 mm high. Hold the cards upright. Join the sides and bottom; leave the top open. The pouch should be comfortable to handle, with no loose sharp parts.

The default design

Default plan: two fabric rectangles, each 100 mm wide and 120 mm high. This is 10 cm by 12 cm. Plan a seam line 10 mm inside the left, right and bottom edges. Leave the top open. These are written measurements, not a printed cutting template.

A reason that fits the purpose

Name a property, explain its effect, then make a choice. Example: the felt model is firm, so it may help support the cards. I choose felt and a hand-stitched join. This is an adult model, not your answer.

Resilience and change

If a sample or tool does not suit the job, revise the design and explain the change. Keep the actual choice for next week.

In your book. Plan in any language. A real test, model description and finished product test are different kinds of evidence.
