A useful card pouch

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Design a small reusable pouch for three paper prompt cards. Each card is 60 mm wide and 80 mm high. Hold the cards upright. Join the sides and bottom; leave the top open. The pouch should be comfortable to handle, with no loose sharp parts.

Written dimensions

Default plan: two fabric rectangles, each 100 mm wide and 120 mm high. This is 10 cm by 12 cm. Plan a seam line 10 mm inside the left, right and bottom edges. Leave the top open. These are written measurements, not a printed cutting template.

Feature	Default design
Number of pieces	Two fabric rectangles
Each piece	100 mm wide by 120 mm high
Seam line	10 mm inside left right and bottom
Opening	Top stays open
Contents	Three cards each 60 mm by 80 mm

What success will mean

The actual finished pouch should let the cards fit without force, hold them upright and stay joined at the sides and bottom when lifted gently. Check that it is comfortable to handle and has no loose sharp parts. Today we plan these tests; we do not claim they happened.

Your design

In your book, draw and label two pieces. Show the three joined edges and the open top. Written ruler measurements govern. Any changed size or opening needs the adult’s revised design check.
