Measuring and marking card

Design and Technology LAUNCH Spring 1 Week 5 Thursday 4 February 2027 P1 Year A

Use the actual approved Week 4 design. The default pouch needs two matching pieces. Measure and recheck before cutting.

Measure	Default target	What to do
Two fabric pieces	Each 100 mm by 120 mm	Align ruler zero with the first mark. Mark the opposite side.
Seam guide	10 mm inside left right and bottom	Make several marks then join them. Leave the top open.
Running stitch	Small even passes about 5 mm apart	Follow the seam guide through both layers.

1 Start at zero

Find the ruler’s printed zero mark. Its physical end may come before zero. Keep the ruler still and flat. Read the line from directly above.

2 Mark two rectangles

Mark 100 mm width and 120 mm height on each piece. Check each side again. These equal 10 cm and 12 cm. Ask the adult to approve the marks before cutting.

3 Mark three seam lines

Measure 10 mm from the left, right and bottom edges. Mark the seam guide. Do not mark a closing seam across the top. Keep the pieces aligned for joining.

This card describes measurements. It is not a full-size cutting template. The pupil’s actual approved design controls any revised dimensions.
