Teacher and cover plan

Design and Technology LAUNCH Spring 1 Week 5 Thursday 4 February 2027 P1 Year A

Measure cut and join our pouch

Weekly outcome verbatim: TEXTILES: measure, cut and join accurately.

LAUNCH Weekly Spring row 201. Year A. Resilience & Change. One 40-minute lesson for a small group aged 14–16.

Retrieve the actual Week 4 design and make the agreed pouch. Record actual measuring, marking, cutting, joining, support and accuracy checks. The default is a two-piece open pouch joined by hand running stitch.

Prepare

Have the actual designs, suitable fabric, rulers, marking tools, agreed fabric scissors, appropriate hand-sewing needles, thread and a needle container ready. Prepare sample layers and an adult demonstration. Check tool condition, supervision and individual access needs. Count needles before issue. If a needle breaks or is missing, stop, keep the area clear, and have the adult recover and account for all parts and control disposal. Do not release the pouch until all sharps are accounted for.

A non-specialist cover adult uses prepared pieces or pupil-directed adult handling unless approved and competent to supervise the tools. No heat, irons or solvents are used. An adhesive route is used only when chosen in the actual approved design and cleared from its real label.

Timing

Stage	Minutes
Arrival	5
Starter	3
I do	5
We do	7
We do 2	5
Independent	8
Review	4
Exit	3

Total 40 minutes. Demonstration cards, checks and tiers fit inside the stages. Pause with tools down and work safe. Prioritise tool return and honest unfinished evidence over rushing.

The design and ruler check

Design and Technology LAUNCH Spring 1 Week 5 Thursday 4 February 2027 P1 Year A

Arrival 5 minutes

Say and do: Retrieve actual designs. Confirm purpose, fabric, dimensions and technique before issuing tools. If the design is missing, agree the supplied default plan today and label that new decision honestly. Check access, supervision, tool condition and needle count. A non-specialist cover adult uses prepared pieces or pupil-directed handling unless approved and competent to supervise the cutting and sewing.

Check and response: Ask: What must this pouch hold? Expect three 60 mm by 80 mm cards upright. Confirm the actual approved design, rather than assuming every pupil chose felt or stitching.

Starter 3 minutes

Say and do: Model the zero mark and explain that a ruler’s physical end may sit before zero. Read 100 mm as 10 cm and 120 mm as 12 cm. Keep millimetres as the working unit. Show the three joined edges and the open top.

Check and response: Ask whether 10 mm equals 1 cm or 10 cm. Correct is 1 cm. Revisit the marked scale if units are mixed.

Demonstration and guided making

Design and Technology LAUNCH Spring 1 Week 5 Thursday 4 February 2027 P1 Year A

I do 5 minutes

Say and do: Use the measuring card and join steps. Demonstrate a checked mark and a short cut with the locally approved scissor method. Then align layers, thread and knot an appropriate needle, start between layers and show small running stitch passes about 5 mm apart along the seam line. Keep fingers clear of the exit point. Pull the thread flat, not tight enough to pucker. Show the securing loop twice and safe tool return. Model one pass, then invite the pupil to explain the next action before handling a tool.

Check and response: Ask: Do we join only one layer or both? Expect both layers on the marked line. If unclear, demonstrate through two prepared layers again before pupil sewing.

We do 7 minutes

Say and do: Guide the first ruler placement, then fade support on the second. Check each rectangle is 100 by 120 mm under the default plan. Mark the left, right and bottom seam lines 10 mm inside the edge; leave the top open. Adult approves before cutting. Cut in the agreed way, or let the pupil direct adult cutting. Align pieces and keep scrap away from needle work.

Check and response: A mark made from the ruler end instead of zero is remeasured. Record actual marks and support; a printed diagram is not a cutting template or a measurement record.

Accuracy hinge and the actual join

Design and Technology LAUNCH Spring 1 Week 5 Thursday 4 February 2027 P1 Year A

We do 2 5 minutes

Say and do: Correct answer is no: the width range is 98 to 102 mm. A 103 mm piece is 3 mm too wide. Remeasure from zero, then discuss whether a safe trim is suitable before joining. Parallel check: a seam line is 7 mm from the edge; the 10 mm target range is 8 to 12 mm, so re-mark before sewing. If either check is missed, return to the ruler and use paired checks before continuing. These are improvement checks, not pupil grades.

Check and response: All pupils can point to the relevant planned and actual values or explain the difference before proceeding. An adult decides whether trimming is safe and still meets the actual design.

Independent 8 minutes

Say and do: Pupils make the approved join with ongoing adult supervision. The timetable label does not mean unsupervised needle or scissor use. Use small even running stitches through both layers. If the actual design chose bonding, use only the cleared label-led route and keep cure or testing pending until complete. A pupil can direct adult handling. Record the real amount completed and support. Stop safely if time runs out.

Check and response: Look for both layers joined along the marked route, open top, safe tool actions and actual pupil role. Do not claim independent sewing where the adult sewed.

Tool return and honest evidence

Design and Technology LAUNCH Spring 1 Week 5 Thursday 4 February 2027 P1 Year A

Review 4 minutes

Say and do: Collect and count all needles first. Record actual measurements on the accuracy card. Compare default width and height with the 2 mm ranges and seam margin with 8 to 12 mm. A revised design uses its own recorded target. Inspect for flat thread and gaps. Keep unfinished work, uncured joins and unsafe or unperformed actions honest. Agree how the item is stored for Week 6.

Check and response: A checked number needs a real measurement, units and support. If a pupil used prepared pieces, separate their checking from the adult’s cutting.

Exit 3 minutes

Say and do: Keep the actual item, design reference, measurements, join stage, support and next step together. Let the pupil correct any scribed words. Week 6 finishes and evaluates the product. No weekly outcome or practical skill is awarded from simulation alone.

Check and response: The record distinguishes pupil action, adult action, actual textile work and simulation. Missing evidence remains pending.

Access support and alternatives

Design and Technology LAUNCH Spring 1 Week 5 Thursday 4 February 2027 P1 Year A

Cognition and Learning

Show one measure or stitch action at a time. Model from ruler zero, then fade the next check. Use the same units throughout. Offer a marked guide, prepared pieces or a repeated checklist, recording support honestly.

Communication and Interaction

Accept pointing, speech, signing and pupil-directed adult handling. Give one short instruction and thinking time. Read the recorded account back for the pupil to correct.

SEMH

Offer a calm pause with tools down and needles counted or safely contained. Agree a short return cue. Keep the accuracy check about improving the work, not judging the pupil. Use private adult feedback if preferred.

Sensory and Physical

Offer an approved adapted tool, prepared pieces, a threaded needle or pupil-directed adult handling. Check actual fabric sensitivities privately. Use a large clear ruler view. No sharp tool is issued until the adult approves the route.

EAL

Rehearse in any language. Pair the ruler value, unit and action word. Check the meaning of through both layers and top open before tools are issued. Use confirmed scribing where needed.

Materials free fallback

With no fabric or safe tools, use a paper model or empty-hand rehearsal. Mark imagined measurements, explain the cut line and trace the running stitch route. Record this as planning or simulation. Keep textile measuring, cutting and joining evidence pending until those actions happen on actual fabric with approved tools.

Where this leads

Textile makers use measurements, safe tools and repeat checks to turn a design into a useful item. Accurate records help another person understand a change.
