Finishing and evaluation activity prompts

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

1 Retrieve

Find the actual design and item. Check the purpose and choose a safe finishing action with the adult.

2 Finish

Use the finishing card and agreed tools. Complete or direct the action. Count and return needles, and remove sharp parts before testing.

3 Test

Try the three actual cards without force. Hold the cleared pouch upright and lift gently over the table. Check joins, loose ends and handling. Wait for full adhesive cure if needed.

4 Evaluate

Use actual results for your own view. Record one improvement, the help used and any part still pending. Then check the six outcomes against real evidence.

If materials or work are missing

Without an actual safe item, materials or tools, use a spoken, signed, paper or empty-hand model. Explain the finishing sequence and predict how a test would work. Label it simulation. Keep actual finishing and product testing pending. Use real earlier evidence for the six-week grid; do not fill gaps with the class model.
