# Finishing and evaluation knowledge organiser

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

Weekly outcome verbatim: TEXTILES: finish and evaluate a textile product.

This is the assessing week.

I can finish my item safely, test its purpose and explain what the evidence shows.

## Today I can

[ ] I can complete or direct an agreed finishing action and record the help used.

[ ] I can test the pouch against its purpose and give my own evidence-based view.

[ ] I can check the six weekly outcomes honestly and choose a next step.

## Finish then test

Secure the agreed loose ends, trim only approved loose tails, count and return tools, and check for sharp parts. Test only when the actual item is cleared and any adhesive has fully cured.

## Our purpose

A small reusable pouch for three paper prompt cards, each 60 mm by 80 mm. The top stays open. It should hold the cards upright, have joined sides and bottom, contain no loose sharp parts and be comfortable to handle.

## Evidence and my view

A prediction says what may happen. A test result records what actually happened. My evaluation uses that result to explain what worked and one useful improvement.

## Six weekly outcomes

Use the Evidence Sheet grid with real work. Choose Shown, More to do or Not yet seen and add a date, location and comment. A tick is weekly evidence, not an award decision.

In your book. Rehearse in any language. Point, speak, sign or direct an adult where needed. Keep actual help and unfinished work visible.
