Staff answers and response guide

Manage my digital footprint

These are possible responses and task guides, not learner observations. Accept a defensible answer based on the facts or actual work. Record each learner’s reasoning and support.

Card key

Card	Judgement or step	Possible action
A	Edit before sharing. The badge could identify a person.	Use a new photo of the craft with the badge and other private details removed.
B	Do not share the address. The draft exposes a private location.	Remove the address; ask staff for the agreed safe collection route.
C	Pause and ask. Permission to share the work is not established.	Ask before sharing; respect a no or no response.
D	Check before keeping. It can show a skill without names or private details.	Check the claim is true, the background is clear and the audience fits.
E	Privacy has limits. A viewer can make a copy beyond the first audience.	Share less detail; ask a trusted adult for help if a copy causes worry.
F	Keep the password private. A password gives access to an account.	Do not send it. Ask a trusted adult through the agreed help route.

Model and hinge

Made-up draft: a photo of a finished craft. A name badge is in the photo too. Pause: that badge shows a private detail. Use a new photo of just the craft. Check who can see it before sharing. A private setting does not stop all copies.

B. A limited audience reduces exposure but cannot guarantee that a viewer will not copy or share content. A promises too much; C adds an unnecessary private detail. Ask what could be removed before sharing. If needed, model how a paper copy can leave its first audience, then recheck with a fictional group photo. Do not demonstrate on a real account.

Individual evidence key

Check the learner links a particular detail to a risk and chooses a proportionate action: keep after checks, edit, or do not share. Accept a supported review of one card and record that the other cards are not yet assessed. The rewritten post must avoid private details and include an audience check. A privacy setting is not proof that copying is impossible. Record the learner’s own explanation and revision, not just the adult model.

Feedback boundaries and next teaching

Card A: Check the background, not just the main object. No actual badge is shown.

Card B: Do not ask pupils to write an actual address or arrange a collection.

Card C: Permission to share work does not make private details safe to include.

Card D: Sharing useful work can be positive. Keeping it offline is also a valid choice.

Card E: Do not promise that deleting the original removes all copies.

Card F: No real login, password, profile search or account access is needed.

Common misunderstandings

A digital footprint is more than the words you type: photos and others' posts may also reveal details. Private settings limit an audience but do not guarantee secrecy. Removing a post may not remove copies. Positive, truthful work can be shared with care; no learner must publish anything.

Teaching boundary

Keep every example fictional and anonymous. Do not collect names, addresses, account handles, passwords or screenshots. Learners may pass on personal disclosure and use a card instead. If a concern arises, listen privately and follow the local safeguarding route; do not investigate it in the group. No account or post is changed in this lesson.

Feedback

If a reason is missing, return to the fact or actual work. Re-model a different example, then keep the learner's own revision. Use NS+ and the learner response in their own colour before R. E means evidence actually banked. Keep safeguarding records separate.

Assessment boundary

CAREERS-LAUNCH-A2-W3-E1 contributes to the source assessment. No criterion, registration or award completion is invented. Sources: FACTS_LEDGER.md.
