

Knowledge Organiser (GROW W2): Reading a Migration Source

Humanities Aut 1 · 2026–27 · Workbook outcome: Use a source to find out about migration to Britain.

Key Word	Definition
content	The diagram above shows the poster in the middle with five labels around it: content, maker, date, audience and purpose. The lines show which part of the source each label points to.
maker	The diagram above shows the poster in the middle with five labels around it: content, maker, date, audience and purpose. The lines show which part of the source each label points to.
date	The diagram above shows the poster in the middle with five labels around it: content, maker, date, audience and purpose. The lines show which part of the source each label points to.
audience	The diagram above shows the poster in the middle with five labels around it: content, maker, date, audience and purpose. The lines show which part of the source each label points to.
purpose	The diagram above shows the poster in the middle with five labels around it: content, maker, date, audience and purpose. The lines show which part of the source each label points to.
Watch me do it:	Watch me do it: I read the caption. It says a transport company made it in 1956. That gives me the maker label and the date label. I read the big words: drivers wanted. That is content. The poster was shown in the Caribbean, so the audience is workers there. I label what I can read first. Then I work out the rest.
shows	The diagram above has three boxes: shows, then suggests, then cannot tell. A finding you can point to on the source goes in the first box. A finding you can argue from the source goes in the middle. Anything not on the source goes in the last box.
suggests	The diagram above has three boxes: shows, then suggests, then cannot tell. A finding you can point to on the source goes in the first box. A finding you can argue from the source goes in the middle. Anything not on the source goes in the last box.

Key Facts

- Last week we put events on a timeline. This week we read a source about one of them.
- Every source was made by someone, at some time, for some reason. Those three facts change what it can tell us.

Arrival Task

What we already know about sources

1) Last week we put events on a timeline. This week we read a source about one of them.

2) Every source was made by someone, at some time, for some reason. Those three facts change what it can tell us.

Why is looking not the same as reading?

Here are two answers about the same poster. Answer A: “It is an old poster about buses.” Answer B: “It is a poster made by a transport company in the 1950s, to persuade workers in the Caribbean to come and drive buses in London.”

Try it in your head: think of a poster on a wall in this school. Who put it there? Who is it for? What does it want you to do? You have just labelled three parts of a source.

We Do 1: Label three parts together

Part 1: the caption says a transport company made it. Which label is that?

Part 2: the big words say drivers are wanted. Which label is that?

Part 3: the poster was put up in the Caribbean. Which label is that?

We Do 2: Annotate one finding together

We annotate one finding on the board first. Nobody writes yet. Everyone puts one finding on a whiteboard with its box name. Then we show them all at once. Then we agree the box. The finding for this is about the audience. What does the poster show about who it was for? Write the finding and the box, not a describing word.

Scaffolding – Standard

Word Bank

content, maker, date, audience, purpose, Watch me do it:, shows, suggests, Space, Voice, Audience, Influence

Your route

Label all five parts. Then write three findings: one the source shows, one it suggests, one it cannot tell. Point to the source for the first two. Use a separate row for each finding.

Sentence frames

"Who ... what they do ... so that ..." | "... because ..."

Reference Zone — keep this beside your work

The model

Watch me do it: I read the caption. It says a transport company made it in 1956. That gives me the maker label and the date label. I read the big words: drivers wanted. That is content. The poster was shown in the Caribbean, so the audience is workers there. I label what I can read first. Then I work out the rest.

Fixing it together: move it. "The poster cannot tell us what jobs people got after they arrived." Now the annotation says only what the source can carry. The words cannot tell are the honest words for a source.

Check yourself

- Check yourself: does every label point to a part of the source?
- Check yourself: does every finding name its box?
- Check yourself: can you point to the source for everything in the shows box?

From the lesson sheet

Reading a Migration Source

SoW: 'GROW Weekly - Autumn'!C47 — "Use a source to find out about migration to Britain."

Learning objective: I can label the parts of a source about migration and annotate what it shows, suggests and cannot tell.

No personal or family history is required. Every task can be completed with the supplied source card and its printed caption.

The source annotation

Label → finding → box. The three boxes are shows, suggests and cannot tell.

The first row is done for you, from the annotation we built together. It is in italics so you know it is not yours. Fill in as many of the rows below it as you can.

Independent Work – Standard

Five parts labelled and three findings, one per box.

Label all five parts. Then write three findings: one the source shows, one it suggests, one it cannot tell. Point to the source for the first two. Use a separate row for each finding.

Part of the source	What I found	Shows, suggests or cannot tell?
<i>the caption</i>	<i>a transport company made it in 1956</i>	<i>shows</i>

Choose a route

1. I chose my own route.
2. My findings are in my own words.
3. Any adult help is written on the record.

5 · Learner confirmation

I confirm this is my own work.

Learner name (print)	Signature
Date	

Exit Ticket – Standard

1) Read one finding to a partner or to an adult. The listener says back the box they heard, in their own words.

2) Did the listener hear shows where you meant suggests? Then change that one word. That change is your influence. It belongs to you, not to them.

3) Next week you will use sources like this one to explain a cause and a consequence of migration. Keep your annotated source. It will help you then.

Lundy Loop — this lesson

SPACE stays available. VOICE is received. AUDIENCE names back exactly. INFLUENCE changes one real next action.

Space	is room to take part;
Voice	VOICE is received.
Audience	AUDIENCE names back exactly.
Influence	INFLUENCE changes one real next action.
