

My school and local features · Pupil resources

Supported arrival · choose one route

Point, speak, sign, draw, write or direct an adult. An adult may read or scribe your exact words. Choose one route; do not complete all three.

1. Find a place

Which place is for learning: school or river?

Help: Think about where lessons happen.

2. Use a symbol

The key says S = school. What does S mean?

Help: Read or point to the words after the equals sign.

3. Use direction

Point to the right side of this page.

Help: An adult can model left, then you show the opposite side.

4. Name a feature

Choose a natural feature: river or library.

Help: A river is flowing water; a library is built by people.

Standard arrival · choose one route

Point, speak, sign, draw, write or direct an adult. An adult may read or scribe your exact words. Choose one route; do not complete all three.

1. Recall a place

Name a place people visit near a school.

Help: Think of a park, library, shop or bus stop.

2. Read a key

Why does a map have a key?

Help: Think about an unfamiliar symbol.

3. Choose direction

A library is on the right of a school on a plan. Which way would you point?

Help: Keep the plan the same way up.

4. Sort features

Which is human-made: a river or a bus stop?

Help: Human-made means people built or arranged it.

Stretch arrival · choose one route

Point, speak, sign, draw, write or direct an adult. An adult may read or scribe your exact words. Choose one route; do not complete all three.

1. Choose evidence

How could you check the name of your school?

Help: Think of a sign, school document or a trusted adult.

2. Explain a key

Why can the same square mean different things on different maps?

Help: Read each map's own key.

3. Describe position

What must stay fixed when we say left or right on a plan?

Help: Imagine turning the page upside down.

4. Question a plan

Can a classroom plan prove a route is safe outside?

Help: Think about roads, crossings and changes.

Evidence to use

Original teaching plan, not a real street map. Key: square S = school; triangle P = park; circle L = library. No scale. Left and right mean across this fixed page.

Supported independent task

Name your school to the adult. Draw a school box. Add or point to two nearby features you know. Show one position with above, below, left or right. The adult may scribe your exact words.

Exit

On the teaching plan, point to the park in relation to the school.

Standard independent task

Draw a simple plan of your school and two real nearby features. Add a key. Describe one feature's position using left, right, near or far. Tell the adult which detail needs checking.

Exit

Name your school and describe where one real feature is on your plan.

Stretch independent task

Draw and label a school plan with three local features and a key. Explain one position and how you would check it against the real place. Explain why this plan alone cannot confirm a safe walking route.

Exit

Explain how the key and a position word together help someone find a feature.
