My school and local features

Objective: Name and locate my school and local features.

locate

find and show where something is

feature

something you can identify in a place

key

the guide explaining map symbols

symbol

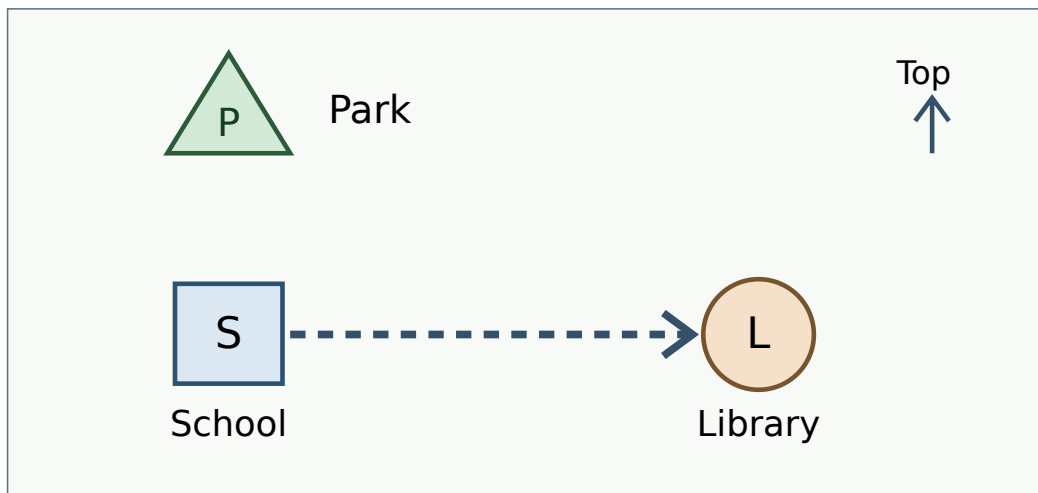

a mark that stands for something

route

the way from one place to another

near

a short distance away in this plan

Original teaching plan, not a real street map. Key: square S = school; triangle P = park; circle L = library. No scale. Left and right mean across this fixed page.

Remember: A map is a view from above, not a picture of the front of a building. Keep the page orientation fixed before using left and right.

Show learning: Use a key to locate two features.

World of work: A school caretaker uses a site plan to locate places and guide visitors. Practise giving a visitor one clear direction.
