Support adult brief

Tuesday 15 December 2026 | P6 | 40 minutes

Before

Prepare earlier files and fresh copies. Offer the brief, chosen route, word page and evidence sheet. Check one private response mode. Keep supplied lesson resources separate from pupil outputs.

Model

Use the separate strip and tab data. Demonstrate one action, then fade. Do not complete the task totals or source reason for the pupil.

During the task

Allow the first attempt. Use the prompt ladder when needed. Record the exact support at the time. Distinguish locating a control or exact scribing from giving a formula, reason or correction.

Time and turn taking

Two devices are preferred. With one device, each pupil has nine minutes while the other plans in their book. Record unfinished actions for a later check; do not rush or infer skills from paper plans.

Evidence

Locate all seven weeks of actual outputs. Record missing files, original dates and today's observations. Do not create replacement work and label it as historical evidence.

Close

Help pupils save and reopen. Give one next step, allow a private response and acknowledge it. No reading aloud or live presentation is needed.
