Staff answers and response guide

Respect and privacy online

These are possible responses and task guides, not learner observations. Accept a defensible answer based on the facts or actual work. Record each learner's reasoning and support.

Card key

Card	Judgement or step	Possible action
A	Respect the answer. One person has not agreed.	Do not post it; choose another suitable image.
B	Privacy concern. Private location details are requested.	Do not share them; ask a trusted adult.
C	Seek support. The comments are causing harm.	Do not join in or forward them; ask trusted staff for help.
D	Check first. The claim has no supporting source.	Check a reliable source before sharing it.
E	Account access. The next person could use the account.	Log out and ask staff if help is needed.
F	Warning sign. Secrecy and pressure are being used.	Pause contact and tell a trusted adult.

Model and hinge

Alex wants to share a group photo. One person says they do not want it posted. Alex respects the answer and does not post it. Alex checks that no private details are visible. If a post causes harm, Alex asks for support. Sharing a concern with trusted staff can help.

C. Consent from other people does not override this person's answer. A smaller group can still copy or share a post. Reteach with an ordinary schoolwork photo containing an unwanted name label. This is respectful privacy practice, not a claim that consent alone makes every image lawful to share.

Individual evidence key

Credit a specific clue and a safer action: A respect no; B protect location details; C do not amplify harm and seek staff support; D check a reliable source; E log out; F seek trusted-adult help. The response must explain why. Do not infer safety from popularity, friendliness or a private-group label.

Feedback boundaries and next teaching

Card A: No real pupil photos are viewed in the task.

Card B: Do not collect addresses or use a live account.

Card C: Staff use the setting reporting route. Do not save or circulate harmful images as classroom evidence.

Card D: Popularity is not proof. No live search of harmful content is required.

Card E: Never request real passwords or login codes.

Card F: Use local safeguarding procedures for a real concern; do not require pupils to confront the contact.

Common misunderstandings

Online rights and respect apply throughout the term. This Week 5 line is ordinary digital-citizenship teaching; Human Rights Day is the Week 6 hook on 10 December. A small group is not a guarantee of privacy. Consent for one use is not consent for every use.

Teaching boundary

Use paper fiction and a pass. Do not ask for private online experiences, credentials or screenshots. Do not forward harmful content. Follow safeguarding procedures for actual concerns. Avoid individual legal advice or promises that deleting a post removes every copy.

Feedback

If a reason is missing, return to the fact or actual work. Re-model a different example, then keep the learner's own revision. Use NS+ and the learner response, in the same colour, on the same page or usual mode, before R. E means evidence actually banked. Keep safeguarding records separate.

Assessment boundary

LAUNCH-PSHE-W5-E1 contributes to the source assessment. No criterion, registration or award completion is invented. Sources: FACTS_LEDGER.md.
