

Compare With Care

I can compare two named source accounts using a shared lens, evidence, difference and qualification.

[Open the original interactive lesson](#)

Teacher reports the approved source pair/lens selected after W11 and explains any boundary.

Standard

Explain why 'both use light' is a starting point, not a complete comparison.

How can we compare celebrations accurately while protecting difference within each community?

Enquiry

COMPARE THE SAME LENS

Compare like with like: the same lens on both.

EVIDENCE BOTH SIDES

A quote from each, with its maker.

SIMILAR SYMBOL $\neq$ SAME MEANING

Do not let a shared image smuggle in a shared meaning.

QUALIFY: SOURCE, PLACE, TRADITION, VARIATION

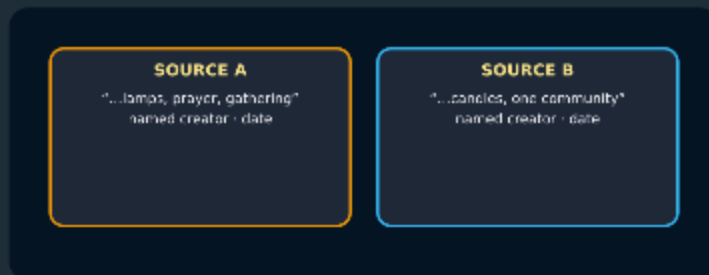

How can we compare celebrations accurately while protecting difference within each community?

Four qualifiers make a comparison honest.

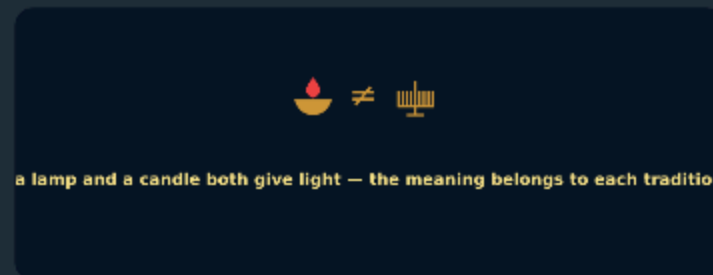

How can we compare celebrations accurately while protecting difference within each community?

Two sources, one lens

Evidence from both

Similar symbol not same meaning

How can we compare celebrations accurately while protecting difference within each community?

QUALIFIER

"According to [source], in [place], within [tradition] ..."
"...and practice varies."

Qualifier

Model defensible map-and-source reasoning

Watch the decision, evidence and limitation—not just the finished sentence.

1. Frame: ‘Both source accounts mention light, but they connect it to different histories, beliefs and practices.’
2. Evidence both sides using creator codes, not unattributed festival facts.
3. Qualify scope: BAPS and Reform Judaism are named perspectives, not every Hindu or Jewish account.

Same-lens checker

Model defensible map-and-source reasoning

A fair comparison looks at the SAME thing in both sources. Choose each pair: same lens, or mismatched?

- A. A: how light is used · B: how light is used
- B. A: how light is used · B: how many people attended
- C. A: what the gathering is for · B: what the gathering is for
- D. A: the food served · B: the date it falls
- E. A: where the event took place · B: where the event took place
- F. same lens

Model defensible map-and-source reasoning

G. mismatched

Choose a pair.

A. Add the four qualifiers

Commit before reveal

Which sentence makes the most careful comparison?

- A. Both named sources include light, but they explain different meanings and neither represents every community.
- B. Diwali and Chanukah are basically the same festival because both use lights.
- C. All Hindus and all Jewish people celebrate in opposite ways.

Add precision without overclaiming

Compare, qualify, protect variation.

1. A valid difference is evidence-led: calendar, historical/religious meaning, practice, setting or source emphasis.
2. Avoid ranking ('better', 'more important') unless the enquiry and evidence genuinely justify a criterion—which this enquiry does not.
3. A comparison grid helps thinking but can flatten lived variation; say what the frame leaves out.

Rehearse the disciplinary move

Compare-with-care lab

- A. Diwali + Chanukah
- B. Chanukah + Christmas
- C. Diwali + Christmas

Rehearse the disciplinary move

Same lens	Source A	Source B	Qualification
Meaning / practice / calendar / place	Name creator + evidence	Name creator + evidence	Some / this source / varies / cannot show

Rehearse the disciplinary move

Choose the approved pair. Compare the same lens and protect variation.

Independent Humanities mission

Compare two approved source accounts through one shared lens. Produce a similarity, difference, evidence on both sides, belonging connection and one scope limitation. A third-person or source-based route is the default.

EVIDENCE READY

Materials Printed route, named source cards and approved atlas/map as specified.

Access / care Enlarge, chunk, colour-adjust, read exactly or use agreed response mode.
No personal disclosure required.

Independent Humanities mission

Evidence target Decision → map/source action or product → learner explanation; highest prompt recorded.

Supported

Complete a two-column evidence grid and use the frame 'Both sources _____. However, source A _____ while source B _____. This may connect people by _____. The sources cannot show _____.'

Both _____ and _____. However, _____ while _____. Source _____ says _____. This matters for belonging because _____. It cannot show _____.

Standard

Independent Humanities mission

Write or record one linked comparison using both sources, a belonging explanation and a within-community qualification.

Shared lens → A evidence → B evidence → similarity/difference → belonging → qualification.

Stretch

Evaluate how creator/perspective or a changed lens would alter the comparison; select the most defensible claim.

Perspective/lens change → what becomes visible/hidden → best-supported comparison.

Close one loop—do not create a second task

Standard

Give the full comparison plus a scope limit.

Named audience receipt

“I heard your claim/decision as _____. Your evidence was _____. Your uncertainty/limit was _____.”

Influence: Pupils choose one viable presentation mode for W13—live, audio with consent, slides or poster—and one audience access need. Adult owner confirms arrangements at W13.
