

Fieldwork Enquiry Verdict

LAUNCH • Humanities • 40 minutes

I can independently construct and evaluate a fieldwork enquiry using question, method, data, analysis, conclusion and limitations.

Name: _____ Date: _____

You may write, type, say, sign, point or direct a partner. An adult can read the words and record your exact response. Keep the choice and explanation your own.

We do • make a choice and give a reason

Commit before reveal: A separate practice enquiry measured noise at only two sites, once. Which evaluation is strongest?

- The method is valid because both sites used the same score.
- It offers a snapshot, but few sites and one time weaken reliability and any wider claim.
- The result proves the same pattern exists across the whole region.

My choice and the evidence I used:

Resources and independent record

LAUNCH Humanities · Week 14 of 14 40 minutes · Aut2·W7 · Fieldwork enquiry write-up (December)

Enquiry: What does our evidence support about place—and what stops us claiming more?

Learning objective: I can independently construct and evaluate a fieldwork enquiry using question, method, data, analysis, conclusion and limitations.

Vocabulary: hypothesis · method · result · analysis · evidence · anomaly · correlation · conclusion · reliability · validity · evaluation · limitation · causation · improvement

CONSTRUCTED CLASSROOM RESOURCE: This fictional composite is inspired by the broad Teesside setting. It is not official data, is not to scale and must not be used for navigation, safety or real-world planning.

Week 14 frozen evidence pack · supplied classroom route

Enquiry: How do environmental quality and pedestrian activity vary with distance from the fictional Transit Gate?

Method record: Six sites at 120 m systematic intervals; three equal 3-minute pedestrian-count trials; litter, traffic pressure, vegetation cover and external upkeep each scored from –2 to +2; same recording fields at every site. Constructed observations represent one simulated period.

Indicator	–2	–1	0	+1
Litter	heavy / widespread	some in several places	mixed / unclear	little / isolated
Traffic pressure	continuous / very high	frequent / high	intermittent / mixed	occasional / low
Vegetation cover	none	sparse	limited / mixed	moderate
External upkeep	poor / widespread disrepair	several visible issues	mixed	maintained / good

Table continued · same row labels

Indicator	+2
Litter	none visible
Traffic pressure	none / very low
Vegetation cover	abundant
External upkeep	very high

Additional plotted indices: Green /5 runs from 1 = very little visible vegetation to 5 = abundant visible vegetation. Noise /5 runs from 1 = very quiet/low audible traffic to 5 = very loud/continuous audible traffic.

Definitions: reliability = consistency/repeatability of results; validity = how well the method and evidence answer the enquiry. A result can be repeatable without measuring the intended idea well.

Site	Distance	Count 1	Count 2	Count 3
Transit Gate	0 m	58	63	61
Market Link	120 m	49	46	50
Civic Crossing	240 m	38	42	40
Riverside Walk	360 m	26	29	27
Park Edge	480 m	18	17	19
Housing Green	600 m	13	12	11

Table continued • same row labels

Site	Mean	EQS (-8 to +8)	Green /5	Noise /5
Transit Gate	60.7	-5	1	5
Market Link	48.3	-3	1	4
Civic Crossing	40.0	0	2	3
Riverside Walk	27.3	4	4	2
Park Edge	18.0	6	5	1
Housing Green	12.0	5	4	2

Constructed scatter graph of environmental quality score against distance; six points from minus five at zero metres to five at 600 metres

Selected W13 context • not direct transect evidence

Matched W13 methods: density = residents per km² inside each fictional administrative boundary; bus departures = weekday scheduled departures 07:00–19:00 from stops within 400 m of each centre; service employment = working residents using the same broad category.

Matched 2025 indicator	Riverside East	Dalehaven
Population density	3,200/km ²	180/km ²
Scheduled bus departures, 07:00–19:00	48	8
Service employment	60%	58%

Frozen boundary: use only this pack or the centre-approved equivalent agreed before start. During protected work, no new evidence, model answer or content prompt is introduced.

Evidence boundary: Teacher-approved/licensed sources retain title, author/producer, date, origin, scale and rights/use. No personal/family location or migration disclosure is required.

Independent evidence • Week 14

Supported

Use only the pre-agreed access route: approved section headings, reading support or exact-word transcription; the judgement stays learner-owned.

Available support: Supported access contract: headings/format/reader/scribe agreed before start; no sentence completion or evidence selection.

Standard

Produce the protected enquiry response using the frozen evidence pack and the approved response mode.

Available support: Standard access contract: independent written, typed or recorded response using frozen materials.

Stretch

Sustain a qualified judgement with counter-evidence, reliability/validity distinction and a justified next method.

Available support: Extended demand: synthesis across data, method and comparison; access remains but content prompting does not.

Response

Evidence → judgement → limitation

My decision / product:

Evidence I used:

Counter-evidence, anomaly or limitation:

Response route: written/taped verbal/recorded annotated/map scribed exact words

Protected-status check: no content prompt used access/process support only. If a content prompt occurs, stop: do not treat the outcome as protected and follow centre rules for a fresh opportunity.

Exit: After collection only: record the response route and whether any content prompt occurred. If it did, mark the outcome unprotected and follow centre rules for a fresh opportunity.

Paper route • discuss the lesson choices

Use these choices with the matching teaching stage. Point to or number a choice, explain it, then revisit it after feedback. The original HTML keeps the live controls.

- 1 • Question What exactly is being tested?
- 2 • Method Could another geographer repeat it?
- 3 • Results Which graph/data answer the question?
- 4 • Analysis Pattern, figures and anomaly?
- 5 • Conclusion How strongly is the claim supported?
- 6 • Evaluation Reliability, validity and improvement?

Choice / card	My reason or evidence	My revision after feedback

Exit • one next step

After the adult has listened, what will you keep, improve or check next?
