

Autumn Science Review Map

BUILD • Science • 40 minutes

Organise previously learned observations about skeletons, nutrition and rocks into an evidence map, then identify what each observation can and cannot support.

Prepare before pupils arrive

Print the pupil pack and open Lesson.pptx. Keep the uploaded HTML available for its live controls. Prepare any approved atlas/source extracts, existing learner work, authorised local data or prior planner named in the source lesson.

Wait, receive and use the least prompt needed.

Keep adult action separate from pupil authorship.

Staff card: preserve the learning goal; change modality before changing demand.

Modal guidance carrier.

At the Lesson overview stage, keep the current science question visible and use the lightest access route that still lets the learner decide. Pointing, selecting, signing, speaking, typing and exact-word scribing are equivalent response routes for Autumn Science Review Map. A familiar adult may read the displayed wording exactly, but the adult does not supply a pupil decision or turn a partial observation into a stronger claim. If regulation or access is the barrier, pause, reduce visual density, offer the printed route or let the learner direct an adult. Nothing is scored, uploaded or saved by this page, and a retry is information rather than a penalty.

For review or assessment lessons, prepare the centre-approved questions, outcomes and existing learner records. Practice cards and a completed worksheet do not supply missing assessment evidence.

Access and participation

Offer reading aloud, pointing, signing, quiet thinking, a no-touch route and exact scribing where these support the learner. Keep the same subject decision. In shared work, let each learner commit before feedback; use a partner as card mover or checker, then swap. Avoid public speed rankings.

Uploaded outcome: Review and evidence learning on skeletons, nutrition & rocks (Entry Level Science / UAS).

Uploaded workbook locator: 'BUILD Weekly - Autumn'!C45

40-minute teaching sequence

Stage / total time	Teaching move	Adult support / response
Arrival • 3 min	Skeleton work used named parts and models to connect structure with support, protection or movement. Nutrition work compared labelled information on the same basis before drawing a conclusion.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.

Stage / total time	Teaching move	Adult support / response
Starter · 3 min	Picture first: three topics, kept separate. Every record you own belongs under one of them.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
I do · 4 min	Record → topic → what it shows Choose a record from the autumn evidence folder, then the topic it belongs to. OBSERVATION what was seen, measured or recorded EVIDENCE an observation used for a stated question LIMIT what the available record cannot establish Read the supplied record without improving it.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
We do · 3 min	Everyone commits through pointing, selecting, saying, signing, typing or directing an adult. Compare the bounded and over-strong responses, then answer a fresh example.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
I do 2 · 3 min	Same reasoning move Connect only records that share a named reasoning move. Different evidence job Keep each source attached to the question it can address.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
We do 2 · 4 min	Supported Sort nine supplied record cards into the three topic headings. Choose one sentence frame per topic: 'The record shows ____.'	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
Independent · 16 min	Supported Sort nine supplied record cards into the three topic headings. Choose one sentence frame per topic: 'The record shows ____.'	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
Exit · 4 min	Choose one topic. State the record, the claim it supports and one limit.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.

The timing belongs to the whole stage. Several PowerPoint slides may share it; do not restart that time on every slide. Full source-stage text is in the PowerPoint speaker notes and original HTML.

Answers, evidence and feedback

This is an open evidence task. Judge accuracy against the supplied source or approved mark points, the evidence chosen, the explanation and the stated limit. A personal preference or self-rating has no single correct answer.

Record the teaching response

What the learner actually showed	Next teaching action
Secure explanation with evidence	Reduce content prompting; offer another example or a limitation.
Partly correct / mixed	Point to the deciding evidence and invite a revision.
Access barrier	Change the reading, sensory or response format; keep the subject decision.
Missing source or observation	Keep the gap visible. Name the source or authorised check needed.

Safety and evidence boundary

Use the centre's authorised practical or fieldwork method and local risk assessment. Supplied sample data, fictional place models, card feedback and rehearsals are teaching material. They are not the learner's practical observations or proof of a qualification outcome. For portfolio use, check the exact registered unit/version, accepted evidence and centre process.

Sources and companion notes

Primary classroom source: [SCI_B_W14A_Autumn_Science_Review_Explore.html](#)

The uploaded lesson is included unchanged. Text and teaching steps in the PowerPoint are editable; source diagrams are placed images. Word booklets are editable. Static PDFs cannot reproduce HTML controls; use the paper cards/tables or open the original HTML.

Verification scope: matched to the uploaded title, pathway, objective, stage sequence and 40-minute timing. Embedded workbook references are retained as source locators; this is not a new line-by-line audit of every scheme-of-work row or a centre assessment sign-off.
