

Topics 2 and 3 assessment review map

Organise the Topic 2 and 3 knowledge to be reviewed and plan how to show it in the supplied assessment.

[Open the original interactive lesson](#)

Retrieve without guessing

The supplied Topic 2 and 3 headings define the review boundary; no new topic is added.

A review map distinguishes knowledge that can be retrieved independently from knowledge that needs a prompt.

An approved response route can be written, selected, spoken, signed, pointed to or exactly scribed.

A missing or uncertain item stays visible for the next authorised check instead of being guessed.

Retrieve without guessing

Arrival decision: The supplied Topic 2 and 3 headings define the review boundary; no new topic is added. A missing or uncertain item stays visible for the next authorised check instead of being guessed.

How can a review map show what is secure, what needs retrieval and which approved response route will show each idea?

Picture first: Topics 2 and 3 plus the skills. Mark each idea honestly — the map is for you, not for a mark.

How can a review map show what is secure, what needs retrieval and which approved response route will show each idea? A review map distinguishes knowledge that can be retrieved independently from knowledge that needs a prompt.

Checking questions:

- The supplied Topic 2 and 3 headings define the review boundary; no new topic is added.

How can a review map show what is secure, what needs retrieval and which approved response route will show each idea?

- A review map distinguishes knowledge that can be retrieved independently from knowledge that needs a prompt.
- An approved response route can be written, selected, spoken, signed, pointed to or exactly scribed.
- A missing or uncertain item stays visible for the next authorised check instead of being guessed.

How can a review map show what is secure, what needs retrieval and which approved response route will show each idea?

Topics 2 and 3 review map

A topic 2 and 3 assessment review map

Review map · secure, retrieve, or uncertain?

Choose an idea, then how you would show it without a source in front of you.

A topic 2 and 3 assessment review map

- A. the order of mitosis stages
- B. percentage change = $(\text{final} - \text{initial}) \div \text{initial} \times 100$
- C. why observed ratios differ from 3:1
- D. A pairs with T, C pairs with G
- E. embryonic vs adult stem cell range
- F. whether a stem-cell lab result would work in patients
- G. secure — I can retrieve it now
- H. needs retrieval practice

A topic 2 and 3 assessment review map

I. an authorised check is needed

RETRIEVE bring learned information back without a source supplying the answer

EVIDENCE a response that makes the learner's reasoning checkable

UNCERTAINTY a point that still needs an authorised check

A topic 2 and 3 assessment review map

Read one supplied review question, name the science idea it checks, retrieve the answer without opening the model, and record the response route used. Compare the response with the approved mark point only after commitment. Mark the item SECURE, RETRIEVE AGAIN or AWAITING AUTHORISED CHECK and write one precise next action. The status describes this review moment; it does not predict an assessment result.

- The supplied Topic 2 and 3 headings define the review boundary; no new topic is added.
- A review map distinguishes knowledge that can be retrieved independently from knowledge that needs a prompt.

A topic 2 and 3 assessment review map

- An approved response route can be written, selected, spoken, signed, pointed to or exactly scribed.
- A missing or uncertain item stays visible for the next authorised check instead of being guessed.
- Organise the Topic 2 and 3 knowledge to be reviewed and plan how to show it in the supplied assessment.

How can a review map show what is secure, what needs retrieval and which approved response route will show each idea?

An approved response route can be written, selected, spoken, signed, pointed to or exactly scribed. A missing or uncertain item stays visible for the next authorised check instead of being guessed.

Available evidence

The supplied Topic 2 and 3 headings define the review boundary; no new topic is added.

Reasoning move

A review map distinguishes knowledge that can be retrieved independently from knowledge that needs a prompt.

Boundary or next check

A topic 2 and 3 assessment review map

A missing or uncertain item stays visible for the next authorised check instead of being guessed.

The supplied Topic 2 and 3 headings define the review boundary; no new topic is added.
A missing or uncertain item stays visible for the next authorised check instead of being guessed.

A topic 2 and 3 assessment review map decision lab

Supported

Match approved question cards to headings, choose a response mode and complete one retrieval frame per heading.

Standard

Organise the full supplied review set, retrieve without the model first and justify the order in which sections will be attempted.

Stretch

A topic 2 and 3 assessment review map decision lab

Diagnose two likely confusions from the supplied set, design a discriminating retrieval check and explain why it separates the ideas.

Build a Topic 2 and 3 review map from the approved headings and local question cards. For each heading, record one retrieval cue, one response route and one check that would show the idea securely. Complete two fresh retrieval attempts and keep the first response visible.

Finish by selecting the first assessment section and the access arrangements that are already authorised locally; leave any unconfirmed arrangement as **AWAITING AUTHORISED CHECK**.

Independent record · A topic 2 and 3 assessment review map

Trace

The supplied Topic 2 and 3 headings define the review boundary; no new topic is added.

Demand

An approved response route can be written, selected, spoken, signed, pointed to or exactly scribed.

Truth

Independent record · A topic 2 and 3 assessment review map

A missing or uncertain item stays visible for the next authorised check instead of being guessed.

Exit route remains available: pause, use the print pack, reduce visual density or direct an adult. The named learning demand remains available.

Audience receives; Influence changes one next action

Show one review heading, the retrieval response and its honest status. The adult names back exactly what is secure and what needs another check. Confirm or correct it, then retain the plan or change one next action.

Final check: no result, quote, date, event or pupil wording has been created to make the map look complete. The HTML stores no learner response.
