Soil and sowing medium

Horticulture: soil, seeds & planting.

Gardening and enterprise
Resilience & Change

Our safe workspace

Use the adult-approved materials and blunt tools.

Wear the agreed gloves. Keep materials away from your mouth.

Keep water away from power. Ask for help with spills.

Cover cuts. Wash hands with soap and water afterwards.

What soil contains

Soil has mineral pieces, organic matter, water and air.

Organic matter includes remains of once-living things.

Living things may also be in soil.

Our sowing medium is chosen for growing seedlings.

Our texture check

Look at a small, lightly damp adult-checked sample.

Use sight, a blunt tool or agreed gloves. Touch is optional.

Describe: gritty or smooth, fine or lumpy, dry or damp.

Texture clues do not prove fertility or safety.

Our medium choice

Which would you choose for sowing?

A Fresh, adult-approved growing medium.

B An unknown sample with debris.

Give one reason for your choice.

Our practical jobs

Step	My job
1	Compare using a chosen observation.
2	Choose the approved sowing medium.
3	Give a reason for my choice.
4	Return tools and clean the work area.

One job at a time. Ask for help or a quiet pause.

My one-line evidence

I chose ____ for sowing because ____.

Tell an adult or use your book.

A drawing with a spoken, pointed or scribed reason is welcome.

Clear up and exit

Return the tools. Let an adult deal with spills or concerns.

Wash hands with soap and water.

Name one texture clue and one safe action.

Next lesson: indoor pea seedling sowing.
