Plant care jobs and routine

White standard edition

Seasonal growing & plant care.

Practical job list

1 Find the original labelled tray and record its code in your book. Choose a handling, observer or recorder job.

2 Check growth, light, moisture and drainage with the adult. Keep roots undisturbed.

3 Choose one care action or waiting. Water gently only when needed. The adult places the tray in a safe bright position.

4 Check root room. Thin or move seedlings only if the adult judges them ready. Keep pea root balls intact. Do not pull tangled roots apart.

5 Record your care reason and agree the routine. Park tools, clear spills and wash hands with soap and water.

No tasting or eating. You can ask for a quiet pause after parking your tool.

Plant care jobs and routine continued

White standard edition

Water and light routine

When	Responsible role	Routine
Each lesson	Checker ____ Recorder ____	Check light, moisture, drainage and root room. Record care or waiting.
Between lessons	Adult backup	Check daily, including absence and nonteaching days. Water only when needed.
After a change	Adult and pupil role	Retain the original tray code. Record a move or new support.

My care decision

I checked ____ and chose ____ because ____.

Useful choices: no water needed / water gently / adult checks the bright position / wait / adult helps with more root room.

Use your book or tell an adult what to scribe. Waiting can be a careful decision.
