Growing knowledge and seasonal calendar

White standard edition

Seasonal growing & plant care.

Three different jobs

Sow means put a seed in growing medium. Plant out means move a young plant to its outdoor growing space after gradual hardening off. Harvest means collect the part grown for use when it is ready. These jobs happen at different times.

A guide rather than a promise

Our calendar shows one spring to autumn route. Weather, frost, variety, light and space affect timing. January is for checking our indoor pea tray and planning. We do not need to sow a new outdoor crop today.

A choice that fits

Check our actual space before choosing two crops. Radish and looseleaf lettuce can suit large draining containers in a suitable bright position. Broad beans need more height and support. A choice stays provisional if the adult has not confirmed the space or care cover.

Crop space clues: radish and looseleaf lettuce need large draining containers or beds. Broad beans need more height, root room and support. Radish stays in its final space.

Monthly growing guide

R = radish. L = looseleaf lettuce.
B = broad beans.

Month	Sow	Plant out	Harvest
January	None	None	None
February	B indoors	None	None
March	R, L outdoors B indoors or outdoors	B	None
April	R, L, B outdoors	L, B	R
May	R, L outdoors	L	R, L
June	R, L outdoors	L	R, L, B

March outdoor lettuce: late month, if conditions suit.
Plant out hardened young plants only.
Harvest only when ready. None means none in this route.
