Tool safety and hygiene card

White standard edition

Seasonal growing & plant care.

Prepare safely

Use only adult-checked samples, untreated garden seeds and clean blunt tools. Cover cuts and use suitable gloves. The adult opens and lightly moistens growing medium before the lesson.

Work over the tray

Keep tools low. Pass handles first and park tools before moving. Keep water away from electrical equipment. Tell an adult about a spill.

Keep material away from your face

Do not taste, sniff or blow soil, growing medium, seeds or seedlings. Avoid making or breathing dust. Keep food and drink away.

Finish cleanly

Return tools, clear the surface and wash hands with soap and water. Gloves do not replace handwashing. You may choose a sight-only, label or recorder role.
