Test rock hardness and water

Today I can… □ show a safe mark test □ watch where drops go □ tell what I saw

Feedback: □ VF □ WS □ I □ NS □ E □ R □ [//] □ [?] _____

TA brief

Before the lesson

Use checked clean blunt rocks, a stable tray and towel. Staff use the blunt tool and control drops. Check edges, school risk assessment and [SYS] guidance. No dust, tasting or forced touch. Wash hands after.

No cold calling. A learner may pass. Read any inaccessible line privately. Record adult prompting separately from the response.

Prompt ladder

1. Point to the relevant place / instruction.
2. Ask one short question: "What is it asking you to find?"
3. Rephrase the instruction in simpler language.
4. Provide a scaffold or limited choice.
5. Model the first step only, then return the task to the pupil.

Arrival · 5 min

Offer a safe kit choice and a short first–then cue.

Starter · 3 min

Ask the three source questions. Answers: observed property; use the tub again if safe; skeleton or bones. Confirm actual taught coverage.

I do · 5 min

Pre-teach hardness, absorb, water and test. Show the full model. Ask whether a wet top proves water went through.

TA brief · teach and hand over

We do · 7 min

Ask “What step is missing? Show it with the kit.” Hand over the observation for B. Preserve the three cards in source order. Offer Supported or Aspire while keeping the same goal.

We do 2 · 5 min

Take all responses at once. Hinge correct: dry the tray, then repeat. Re-model if not secure; use the parallel hinge in Staff Answers. Include a quiet-minute reset.

Independent · 8 min

One adult supports learners while one holds the group; agree roles at the start and swap across the week. Use the actual staffing plan if only one adult attends. Ask “What can you do first on your own?” Record the deepest prompt and the independent response.

Review and improve · 4 min

Give VF and one specific NS(+). Invite one self-edit //. Include a quiet-minute reset.

Exit · 3 min

Hear what the learner observed in the chosen response mode. Pass on the deepest prompt and what was independent. Choose the next starter from the response. Include a quiet-minute reset.

Regulation and re-entry

Agree a quiet supervised pause. Give one short cue. Re-enter at the last completed step. Do not collect evidence while distressed. Allow planning in any language. Use agreed access tools on the staff device.
