Researching occupations

Tuesday 17 November 2026 · P3 · 40 minutes · Year A

GROW · up to five learners · Independent is the default

Unit: Identity & Belonging — Belonging in work

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

Exact source outcome

I can research two occupations from more than one source and identify similarities, differences and unanswered questions.

Weekly outcome: Students research job tasks, conditions, pay, entry routes and progression using reliable sources.

Source of record: specialist Careers scheme, GROW Careers, physical row 11, Autumn 2 row 3. E11 weekly outcome; F11 focus; G11 exact outcome; H11 sequence; I11 timing; J11 evidence; K11 access; L11 support; M11 end check; N11 formative.

Question and success checks

How can several sources help us compare two jobs and spot what we still need to ask?

1. Use at least two labelled source cards for each of two occupations. 2. Compare one similarity and one important difference with card evidence. 3. Keep one unanswered question for each occupation.

Prepare

Books, pens, the six prepared cards, vocabulary mat and normal reading or typing aids. Keep the adult answer key apart from first responses. A calculator is optional for comparing figures; no calculation is required. No web, login or pupil phone is needed.

Source adaptation

The owner specifies prepared contrasting source cards inside the pack. Use three cards per occupation: a broad role guide, one sample vacancy and one worker account. All are invented teaching texts, dated 30 October 2026. They offer different perspectives but are not independently verified real-world sources. The exercise practises source selection, comparison and questions; it cannot establish current pay, entry rules or actual vacancies. Real locations are replaced with generic work settings. Preserve the exact outcome and record this boundary.

Where this leads

This helps me compare work using evidence and ask useful questions before making a career choice.

Forty minute teaching sequence

Phase	Min	Teaching and evidence
Retrieval	5	Recall a source label, date and limit from Week 2. Neutral fallback: a sample card gives one example, not every job.
Explicit input	7	Explain the three source types. Check A2 label, date, purpose and scope. Model a short profile note and an unanswered question. Check what one vacancy can show.
Guided comparison	10	Use A1/A2 and B1/B2 to compare tasks and hours. Read A3/B3 for another view. Use the main and parallel hinges; explain why different posts can have different shifts.
Independent application	13	Research both occupations from at least two cards each. Record all seven fields with labels, or a clear gap. Give a similarity, an important difference and one unanswered question per occupation. Feedback then fade answer prompts.
Reflection	5	Ask for one important difference backed by cards. Review source use and both questions. Keep the first response, any change and next research action in the Careers Portfolio/action plan.

Total 40 minutes. Source checks, reading, vocabulary, feedback and access pauses sit within these phases. Slide 11 is an access reference; slide 12 is hidden for staff.

Worked example and fade

A2: “This is a sample vacancy, dated 30 October 2026. It describes one invented stockroom post. I can record 35 paid hours, weekday day shifts, and £26,000–£29,000 gross a year. A1 adds a possible next step in stock records or guiding a team. I still need the exact shift start time.” Point to each card label. The date tells us when the teaching card was prepared; it does not verify a real job.

Fade to B2: ask the learner to find the hours and source label, then let them use B1 to add a different detail. Retain usual reading or scribing access as answer prompts fade. The final comparison must remain the learner’s own.

Check after explicit input

Ask privately: Does A2 give the hours for one example post or every stockroom job? Which other card could add a broader view? Expected: one post; A1 adds broad tasks and possible next steps. If unclear, point to the source type and model one bounded note again.

Routes and planned access

Independent

Research both occupations with the structured field list. Use at least two source cards per occupation; the third can add or challenge a first view. Record card labels beside claims, all seven fields or explicit gaps, a similarity, an important difference and one unanswered question for each job. Explain how the source type limits a claim.

Supported

Read one card and one field at a time. Use the separate model, vocabulary bank and highlighted source labels. Start with A1/A2 and B1/B2. Rehearse the comparison privately. Keep both occupations and more than one source for each. Fade answer prompts where secure, retaining normal access.

Floor

Use the short choices with the source cards in view. An adult may read the cards and scribe the learner’s own choices. Point to at least two sources for each job. Choose or state a similarity, difference and an unanswered question for each job. Record uncompleted profile fields and supplied answers separately. One occupation or one source alone is partial evidence, not the full outcome.

Cognition and Learning

Use explicit instruction, a separate model and guided practice. Chunk by occupation, source and field. Keep labels beside notes. Reuse the same question routine. Allow extra processing time and a one-card view.

Communication and Interaction

Pre-teach occupation, source, duties, hours and entry. Rehearse privately. Accept speech, pointing, reader, scribe or typing. Ask short questions and wait. No cold calling or compulsory pair talk.

SEMH

Use a predictable sequence and private feedback. No household pay, job history or fixed career choice required. A learner may be unsure and keep a question. Offer a regulation break with a planned return.

Sensory and Physical

Use clear print, one-card views and usual reading or input aids. No colour-only clues. Keep a calm, uncluttered space. Do not infer whether a learner can do a role from the sample work conditions.

EAL

Plan in any language. Check duties and entry with a concrete example. Offer oral rehearsal and short frames. Separate language access from the learner’s comparison and reasoning.

Normal access does not automatically change the academic route. Log answer prompts separately from reading, scribing, typing or other usual aids.

Staff prompts and checks

Hinge during guided comparison

A2 lists weekday shifts for one stockroom post. A3 describes weekends in a different post. Which claim fits? A: One card must be false. B: Different posts can have different shifts, so check the post you mean. Answer B. Ask for both card labels. If insecure, underline “one post” and “different post”, re-model the scope, then use the parallel hinge.

Parallel hinge

B2 is a weekday example; B3 describes evenings in a different post. Can we claim every reception job has the same hours? A: Yes. B: No; the cards describe different examples. Answer B. Ask what to check next: the exact shifts for the particular post. Retain supported work and log uncertainty if the distinction remains insecure.

Speaking frames

F: “Card ... says ... . The other card adds ... .” M: “Both roles ... . One difference is ... . Cards ... and ... show this.” H: “This source only shows ... . I still need to ask ... before using it for a real choice.”

TA focus

I do: check source label, date, type and scope. We do: ask for a card clue rather than choose the answer. Independent: record access and actual answer prompts; fade prompts when secure. Support a calm return after a break and rehearse the next research question.

Prompt ladder

1. Point to the place or instruction. 2. Ask a short question. 3. Rephrase the instruction. 4. Provide a scaffold or choice. 5. Model the first step only, then return the task.

Misconceptions and corrections

“Two cards must prove a fact is true for all jobs.” Several examples still have limits; check purpose, scope, agreement and gaps. “An unanswered question means the research failed.” A precise gap is useful. Name what evidence is missing instead of guessing.

Evidence and source end check

J11: Two-job research profiles with source record. M11: Can the student identify one important difference between the two researched occupations? Check this difference with card evidence, then check the full outcome separately: two occupations, at least two sources each, a similarity, a difference and unanswered questions.

Assessment and safe teaching

What this lesson can evidence

Week 3 is formative. Retain two job profiles and source labels beside claims, plus one similarity, one important difference and one unanswered question per job. The seven requested fields are duties, hours, salary range, location/work setting, entry, progression and typical working conditions. A documented gap is honest research. Record missing fields and supplied answers; never fill a gap by invention. The single source end check is not the whole outcome.

Response and feedback

Work in the book by default. Type instead is an optional equivalent record with the same fields and demand. Reader, scribe, speech, pointing and typing remain normal access. No pupil phone or login needed.

VF verbal feedback; WS worked with support; I independent; NS next step in green pen; // self-edit; ? read this back to me; E evidence recorded; R responded. Give one precise next step. R requires Voice and Audience, NS and the learner’s response in their own colour. A private adult can be the audience. Use E only when actual evidence is banked.

Portfolio

Keep the first comparison, source record, actual support and any revision in the Careers Portfolio/action plan. Offer to the Communication portfolio. Staff confirm any accredited mapping from actual work; no unit completion is inferred. Keep one question as a next research action.

Teaching need next lesson _____ Next research action _____

Boundaries

All six source cards are authored practice examples. Salary figures are invented gross annual ranges for sample posts with the same paid weekly hours. They do not show actual market rates or take-home pay. No real region, employer, organisation, qualification or entry rule is named. Different worker accounts describe different posts; they neither disprove nor verify the sample vacancy. Do not rank people or work by pay. No personal financial disclosure or final career decision. Follow the usual safeguarding route if needed.

Calendar and sequence

Year A. Autumn 2 Week 3, 16–20 November 2026. Tuesday 17 November, P3, 40 minutes. Week 6 retains mixed formative/summative marking; Week 7 is assessing. Weeks 4–7 follow in order, one return at a time, after Downloaded.
