Compare settlement samples

Tuesday 8 December 2026 | P2 | 40 minutes | Year A

White paper version | Read quietly. Point, write, type or use a scribe. No reading aloud is required.

Route: Supported | Learner code ____ | HUM-LAUNCH-A2-W06-E1

MODEL ONLY. Place A is inland; Place B is coastal. Both are fictional. Use prepared cards S1–S3; there are no live links. Read quietly. You do not have to read aloud or answer publicly.

1 Read or view S1 and S2 quietly. Point to what is counted. Both samples have twenty plots.

2 Use workshops for a similarity. Choose residential or open space for a contrast. Keep both counts and the source code.

3 Use the frames below. Choose one limit from S3. Add a possible reason that still needs checking.

Analyst chooses a feature. Checker verifies the category, counts, unit and source. Swap after the first comparison. Each learner keeps their own final note.

Similarity: Both samples have ____ ____ plots. Source ____.
Contrast: A has ____ ____ plots and B has ____. Difference ____ plots. Source ____.

Possible reason ____; we would need ____ to check it.
Limit ____; so we cannot claim ____. My next check is ____.

Finish

Keep your own comparison note: a similarity, a contrast across two matched features, exact counts/source codes, a possible explanation and a limitation. Point, write, type or direct a scribe. Record the help actually used. These notes are not the assessed fieldwork write-up.

Tuesday 8 December 2026 | P2 | 40 minutes | Year A

White paper version | Read quietly. Point, write, type or use a scribe. No reading aloud is required.

Route: Independent | Learner code ____ | HUM-LAUNCH-A2-W06-E1

MODEL ONLY. Place A is inland; Place B is coastal. Both are fictional. Use prepared cards S1–S3; there are no live links. Read quietly. You do not have to read aloud or answer publicly.

1 Check that units, categories, method and sample sizes match in S1–S2. Retrieve the key and the graph checks from earlier work.

2 Compare two matched features. Keep one similarity and one contrast, exact counts and source codes. Add another contrast if useful.

3 Suggest a possible explanation and an alternative or limit. Write your own note, then check what would need more evidence.

Analyst chooses a feature. Checker verifies the category, counts, unit and source. Swap after the first comparison. Each learner keeps their own final note.

Similarity: Both samples have ____ ____ plots. Source ____.
Contrast: A has ____ ____ plots and B has ____. Difference ____ plots. Source ____.

Possible reason ____; we would need ____ to check it.
Limit ____; so we cannot claim ____. My next check is ____.

Finish

Tuesday 8 December 2026 | P2 | 40 minutes | Year A

White paper version | Read quietly. Point, write, type or use a scribe. No reading aloud is required.

Route: Aspire | Learner code ____ | HUM-LAUNCH-A2-W06-E1

MODEL ONLY. Place A is inland; Place B is coastal. Both are fictional. Use prepared cards S1–S3; there are no live links. Read quietly. You do not have to read aloud or answer publicly.

1 Compare at least two features and test an extra contrast. Check whether a proportion adds useful evidence to the equal samples.

2 Explain the difference between a count pattern and a cause. Consider another explanation for the same pattern.

3 Evaluate the one-route sample and its coding. Suggest a stronger follow-up and state which claim it could test.

Analyst chooses a feature. Checker verifies the category, counts, unit and source. Swap after the first comparison. Each learner keeps their own final note.

Similarity: Both samples have ____ ____ plots. Source ____.
Contrast: A has ____ ____ plots and B has ____. Difference ____ plots. Source ____.

Possible reason ____; we would need ____ to check it.
Limit ____; so we cannot claim ____. My next check is ____.

Finish
