The aim

I can compare sources and use evidence to explain a choice.

Four checks

Who made it? When was it made or checked? Why was it made? What evidence is shown?

Compare

Do two sources give separate evidence? Two copies of one claim are not two checks.

Keep a limit

A neat page or a new date does not prove a claim. A source may help with one question but not another.

My success checks

[ ] I compared who, when, purpose and evidence.
[ ] I used two source letters and details for my choice.
[ ] I named one thing I still need to check.
[ ] I saved and reopened my own work.

Where this leads

Before an application, check role and training details against current evidence so your choices are well informed.
