Words for spreadsheets

Tuesday 24 November 2026 | P6 | 40 minutes

cell

One box in a spreadsheet.

cell reference

The column letter and row number, such as B4.

input

A value you enter or change.

formula

An instruction that starts with = and works out a result.

range

A group of cells, such as D4:D6.

recalculate

Work out the results again when an input changes.

A useful reason

My formula uses ... so the result changes when ...

_____

_____
