The aim

I can make three slides easier to read and navigate.

Clear content

Use one main point per slide and a useful title. Keep the facts correct. Short sentences help.

Readable text

Use a plain layout, larger text and strong contrast. For this practice use body text at least 28 and check it on the display.

More than colour

Use names and values with colour. The audience should not have to guess what a colour means.

Images and order

Describe the meaning of a useful image. Check the title comes first in reading order. Then the image and the comparison.

My success checks

[ ] I used clear titles and readable text.
[ ] I described the chart and checked the reading order.
[ ] I explained one change, then saved and reopened my slides.

Where this leads

Office and support roles use clear slides to explain information. Describing one access change gives evidence of a communication skill for an application.
