Teamwork in a Vocational Setting

What I am learning

I can take a clear role in a team task.

I can support a teammate.

I can describe what good teamwork looks like.

Agree who will do each part. Do your part and check what the team needs. A quiet role counts. You may ask to change roles.

Teamwork in a Vocational Setting

The task steps

Agree three roles: card chooser, label maker and checker.

Choose cards for a garden kit display. Use a trowel, a watering can and a pot.

Add a name label and a job for each card. Help a teammate without taking over.

Check all three cards and labels. If one is missing, agree who will finish that part.

Teamwork in a Vocational Setting

Words and worked example

team: People working on a shared task.

role: The part you agree to do.

reliable: Doing your agreed part.

support: Help that lets someone do their part.

listen: Attend to what someone tells or shows you.

solve: Find a way to deal with a problem.

I am the checker. I count three tool and kit cards. The pot has no label. I tell the label maker and ask what help they want. They choose the words. I check again. I supported the team without doing their role for them.
