Complete a Supported Vocational Task

What I am learning

I can complete a vocational task from start to finish.

I can work safely and to the standard.

I can review how my task went.

Bring your skills together. Plan the task, follow steps, work safely and check the finish. Support is part of the task when you need it.

Complete a Supported Vocational Task

The task steps

Agree a task and its finish standard with the adult. Read all steps.

Choose kit, roles and safety checks. Ask before using any real tools.

Complete each step in order. Stop and ask if a step is not clear.

Check the finish against the standard. Tidy as agreed. Say one success and one next step.

Complete a Supported Vocational Task

Words and worked example

plan: Decide the steps before you start.

standard: What the finished task must be like.

complete: Finish all agreed parts.

review: Check how the task went.

evidence: A record of what you did and the help used.

improve: Make a part better after a check.

My task is to prepare a garden kit station. The paper rehearsal has a tray with a pot, trowel card and watering can card. Each needs a name and job label. I check all three, then review my work. Real kit is checked by the adult before use.
