BUILD Careers · Spring 2 Week 2 · Public edition

Attendance, punctuality and reliability

Unit: Resilience & Change — Work-ready resilience

Theme: Resilience & Change. Five teaching weeks. Week 5 is the closing lesson and brings rows 26 and 27 together. Group: up to five learners. Supported is the default.

Exact lesson outcomes

I can explain why being on time matters and choose an appropriate action if I am delayed or absent.

Source: BUILD Careers scheme, Spring 2 rows 23. Focus and outcomes supplied verbatim in the current brief.

Prepare and purpose

Teach useful habits with invented, unnamed workplaces. Books, pens, Support Cards, Vocabulary Mat and Evidence Sheet. Print cards as reusable references. No write-on pupil sheets, internet, login or personal phone is needed. Read the exact outcome aloud and explain the short goal.

Where this leads: Safe, clear messages about time help in future work, visits and work experience.

Thread tags: SMSC S/So; British Values IL/MR. Respectful speech, a private choice of response and safe help-seeking are practised.

Forty minute sequence

Phase	Min	Main action
Arrival and retrieval	5	In your book: write the title or ask for a scribe. Recall one work skill. Choose the time that gives the worker time to be ready.
I Do	8	Say: 'No. I stay safe and tell the agreed contact.'
We Do	10	Choose an action. Say: 'This helps because ...' Pick the best next step. Say one reason.
You Do	12	In your book: show why being on time helps. Show what to do if late. Show what to do if away.
Review and exit	5	Check my three answers. Add one detail if I need it. Finish: 'If I cannot be there on time, I will ... This helps ...'

Teaching and checks

Arrival and retrieval 5 minutes

Use a calm check-in. Read the goal aloud. Explain that these are made-up work tasks, not pupils' attendance records. Recall one work skill. Read aloud a 9:00 team start and arrivals of 8:55 and 9:10. Ask which gives time to get ready.

I Do 8 minutes

Model the delayed-worker example. Explain two effects of time: the team can plan and a task can start safely. Model telling the agreed contact as soon as safe, using the agreed way, and following the next instruction. Check: 'Must I rush or take a risk if I am late?'

We Do 10 minutes

Use the four scenario cards. For each, ask what the worker should do and why. Distinguish delay from absence. Rehearse a short factual message without personal or medical details. Ask the hinge question with simultaneous pointing or choice cards. If any pupil waits silently or chooses rushing, model a safe contact message and use the parallel hinge. If secure, remove the message stem for a new delay.

You Do 12 minutes

Offer the three routes. Require one reason why time matters, one delay action and one absence action. Let pupils dictate, draw or write in books. Record the support actually used.

Review and exit 5 minutes

Compare a silent delay with an early message. Ask which lets the team plan and why. Revisit the success criteria. Give each pupil one attainable next step. Ask the exit prompt. Record a short evidence note. Reinforce that illness and travel problems may happen; the taught skill is using safe, agreed communication, not blame.

Model and fade

I must stay safe. I use the agreed way to tell the agreed contact: 'I am delayed. I may be late for 9:00. I will update you when I know more.' I follow the reply. This lets the team plan.

A worker cannot come in today. 'I cannot come in today. I will follow ____.' This helps the team to ____.

Hinge and parallel recheck

Main: A worker will be late. What is the best action? A: Say nothing and rush. B: Stay safe and tell the agreed contact as soon as possible. Key B.

Parallel: A worker cannot come in today. What is the best action? A: Follow the agreed absence steps and tell the agreed contact. B: Wait until the next day to say anything. Key A.

If any pupil chooses A or cannot explain B, model the contact message and safe travel step, then check with the parallel hinge.

Access evidence and feedback

Supported

In your book: choose a reason why time helps. Match a late card and an away card to the right action. Point, draw or tell an adult your answers.

Independent

In your book: give one reason to be ready on time. Write or say a short delay message. Choose what to do if absent. Use the agreed contact and steps.

Aspire

In your book: give two reasons time matters. Plan a delay message and an absence message. Add what to do if the first message gets no reply and there is an agreed next step.

Planned adaptations

Cognition and Learning: Use two simple picture or word choices for late and away. Read clock times aloud so reading a clock is not the learning barrier. Keep the three-step prompt visible: stay safe, tell the agreed contact, follow the agreed steps.

Communication and Interaction: Rehearse one message with an adult before a partner role play. Offer a written stem, pointing or a scribed response. Allow wait time and no public performance requirement.

SEMH: Do not use real attendance, punctuality or health records. Use third-person workers. Avoid blame. Offer an observer role and a calm reset with a clear return task.

Sensory and Physical: Use large print, uncluttered time cards and a seated role. Accept dictation or a scribe. Teach safe communication without requiring a real phone or travel task.

EAL: Plan in any language. Contrast late and away with short examples. Accept a first-language rehearsal, then model one brief English message.

Prompt ladder and adult focus

1 Point to the place or instruction. 2 Ask a short question. 3 Rephrase the instruction. 4 Provide a scaffold or choice. 5 Model the first step only, then return the task.

I do: Point to the safe contact steps and check the difference between delayed and absent.

We do: Prompt for a reason, not just a choice. Use made-up cases and avoid questions about the pupil's history.

Independent: Record whether the pupil can explain time, select a delay action and select an absence action. Note each prompt used and one next step.

Record what is shown

Keep the actual response to: Why being ready on time matters; Appropriate delay action or message; Appropriate absence action or message. Record date, work reference, response route, usual access, supplied answers and prompt level. A pass or missing work is not yet seen; say which. Do not count the adult model as independent work.

VF verbal feedback; WS worked with support; I independent; NS next step; // self-edit; ? read back; E actual evidence saved; R responded. R follows Voice and Audience, one NS and the pupil reply in the same colour, on the same page or usual mode. Add to Careers Portfolio. Offer to the Communication portfolio.

Evidence may contribute to the unit award. Staff check actual evidence; the lesson does not automatically confirm an award. Ask a trusted adult for a private talk. Point to HELP, write or use your aid. You may pass, pause and return with help. No personal story is needed.

Use the normal concern route if a pupil shares a worry. Listen without probing or promises of secrecy. Keep private concerns outside portfolio work.
