Staff answers and teaching notes

Tuesday 23 March 2027 · P3 · 40 minutes · Year A

BUILD Careers · Spring 2 Week 5 · Shared resource

I can respond to feedback without giving up and choose a sensible next step after a mistake.

I can rate my work-readiness and choose one skill to improve before work experience or transition.

Model and card answers

All workplace cases are invented. Accept equivalent safe language. Do not require a public performance or a personal history.

Card A

Thank you. Please show me the right shelf. Then check the label and move the box with help if needed.

They listen, ask what to do and use the feedback to put it right.

Card B

Ask which shelf, then put the cups there if it is safe.

A short question helps the worker fix the error and try again.

Card C

Thank you. I will check the pots. Water the missed plant as instructed, then check each pot before finishing.

The worker responds to feedback and uses a simple check to avoid the same error.

Card D

No. Say, 'I need help to move this safely.' Stop and ask the responsible adult or team leader.

Resilience includes asking for help and keeping safe. It does not mean obeying an unsafe request.

Worked example and fade

Pause. Listen. Say, 'Thank you. Which shelf is right?' Check the label. Move the box safely.

Fade only answer cues; keep reading and communication access.

Judgement and safe delivery

Main hinge

A worker is told a label is wrong. What is a useful next step? A: Hide the label and stop trying. B: Ask what needs to change, then check and fix it. Key B.

Parallel hinge

The task has one error. What could the worker do? A: Ask for help, fix the error and check again. B: Keep the error secret. Key A.

If the reply is unsafe or unclear, reread A, model a calm question and recheck with the parallel item before C.

What to retain

Calm response to feedback; Sensible fix after a mistake; Check for next time; Chosen skill and work clue; Small step support and check time. Record the actual words or selections, first attempt, work reference, usual access, supplied choices and answers, one NS and reply. Spelling and handwriting are not the target.

Common errors

A mistake does not mean the worker must give up. A safe pause or help request can be a useful next step. Effort never requires an unsafe task.

The closing grid has six outcomes across five lessons. Rate self-readiness privately, then choose one specific skill and small improvement step with support and a check time. A confident rating is not proof of competence. Missing earlier evidence stays visible.

Access and private help

Book, pointing, an aid, typing or an exact scribe are valid. Read back a scribed reply and allow a change. Record access apart from supplied answers. Plan in any language.

Ask a trusted adult for a private talk. Point to HELP, write or use your aid. You may pass, pause and return with help. No personal story is needed.

1 Point to the place or instruction. 2 Ask a short question. 3 Rephrase the instruction. 4 Provide a scaffold or choice. 5 Model the first step only, then return the task.

VF verbal feedback; WS worked with support; I independent; NS next step; // self-edit; ? read back; E actual evidence saved; R responded. R follows Voice and Audience, one NS and the pupil reply in the same colour, on the same page or usual mode. Add to Careers Portfolio. Offer to the Communication portfolio.

Only the unit award is named. Staff confirm any mapping from actual evidence. If a concern arises, listen calmly, avoid probing or secrecy promises and follow usual procedures. Keep private concerns out of shared work.
