Knowledge organiser for atlas skills

Friday 26 February 2027 | P2 | 40 minutes | Year A

Humanities | GROW | Spring 2 Week 1 | HUM-GROW-S2-W01

Learning outcome: Use atlases and maps to locate climate zones and hazards.

An atlas is a book of maps. An index helps you find a place. Our atlas has one page. The grid helps you find a box. Read the letter across, then the number down.

Word or mark	Meaning
Tropical	Hot through the year, near the Equator.
Temperate	Between tropical and polar areas. Seasons vary.
Polar	Very cold for much of the year, near the poles.
Dry	Very little rain. The Sahara is a dry region.
Circle	Earthquake hazard.
Triangle	Volcano hazard.

Climate is the usual weather over many years. A hazard is something that could cause harm. A hot climate does not cause an earthquake. Many earthquakes and volcanoes occur near plate edges.

Where this leads: map makers and people who plan journeys use an index, grid and key.
