My atlas map

Friday 26 February 2027 | P2 | 40 minutes | Year A

Humanities | GROW | Spring 2 Week 1 | HUM-GROW-S2-W01

Learning outcome: Use atlases and maps to locate climate zones and hazards.

You may point, write, type, speak in private or direct a scribe. You may pass. Reading aloud is your choice.

Route Aspire

1. Do the five core places on your own map. Use the index and key to check them.

2. Add the Sahara as a dry climate in E3. Add both hazard marks for Iceland in D1.

3. Explain why a climate map alone cannot tell you where an earthquake will happen. The atlas shows broad patterns, not the time of the next event.

In your book

In your book, use a blank map. Label the Amazon Basin, the Mediterranean and the Arctic with their climate zones. Plot a circle for earthquake hazard in Japan and a triangle for volcano hazard in Indonesia. Add a key. Use the index and grid to check each place.

I found ____ in box ____. The key shows ____. This place has ____.

You may plan in any language. An adult may read or scribe your exact choice. Record the help used.

My check

I used the index and grid. I placed three climate labels and two hazard marks. I added a key. I checked one place with my partner.

Use the agreed quiet signal for a pause. Stay with the adult in the usual place. Rejoin with one map check. A neutral shape task is ready.
