Place and hazard cards

Friday 26 February 2027 | P2 | 40 minutes | Year A

Humanities | GROW | Spring 2 Week 1 | HUM-GROW-S2-W01

Keep the place, box and clue together. Read one card, find the box, then check the key. Use the first five cards for the core task.

Amazon Basin C4

Tropical. Hot through the year. Much rain falls in the rainforest.

Mediterranean E2

Temperate. This is one type of temperate climate. Summers are dry. Winters are mild and wet.

Arctic E1

Polar. Very cold for much of the year. The warm season is short.

Japan H2

Earthquake. Japan is near plate edges. Earthquakes can happen here.

Indonesia G4

Volcano. Indonesia is near plate edges. It has many volcanoes.

Extra Sahara E3

Dry. Very little rain falls here. Dry is a climate type too.

Extra Iceland D1

Earthquake and volcano. Iceland is on a plate edge. It can have both hazards.

These are selected climate regions and hazard locations. They are not all of the world’s climates or hazards. A hazard mark is not a prediction of the next event.
