Case Story

Friday 5 March 2027 | P2 | 40 minutes | Year A

Humanities | GROW | Spring 2 Week 2 | HUM-GROW-S2-W02

On 11 March 2011, a strong earthquake happened under the sea near Japan. Part of the sea floor moved. This helped cause a tsunami, a set of large waves. The waves reached the coast of the Tohoku region. This lesson looks at some effects and the work to recover. People and places were not all affected in the same way.

Japan 2011: some effects

11 March 2011. Tohoku region, Japan.

E1 Homes and shelter

Some homes were damaged. People used shared shelters in the first days.

E2 Roads and travel

Some roads and rail lines were damaged. This made travel hard at first.

E3 Water and power

At first, power and water supplies stopped in some areas.

E4 Rebuilding

Homes and transport routes were rebuilt over months and years.

Effects were not the same for all people or places.

This is one real case. We use calm words and diagrams. No one needs to share a personal story. We do not act out the hazard.

The earthquake and tsunami happened on 11 March 2011. The effects and recovery lasted for different lengths of time. There is no casualty or graphic detail in this pack.
