Climate change causes and effects

Friday 12 March 2027 | P2 | 40 minutes | Year A

Humanities | GROW | Spring 2 Week 3 | HUM-GROW-S2-W03

Learning outcome: Investigate causes and effects of climate change.

You may point, write, type, speak in private or direct a scribe. You may pass. Reading aloud is your choice.

Route Supported

1. Use all six cards, one at a time. An adult may read. Choose cause or effect with a reason.

2. Use C1 and C4 to build a chain: burn fuel, more gas, more trapped heat, warmer Earth. You choose each step.

3. Point to the highest and lowest graph point. Use the key and data table. Choose a UK sentence ending and record your choices in your book.

My own finish

In your book, sort C1 to C6 into causes and effects. Build one cause-to-effect chain with at least three steps. Read the graph to find the highest and lowest selected year. Finish one sentence about what this could mean for a general UK region.

____ adds gas to the air. More heat is trapped, so ____. For our UK region, this can mean ____.

My check

I used the facts. I made my own choices. I gave a reason. I can show the help I used.

Use the agreed quiet signal for a pause. Stay with the adult in the usual place. Rejoin with one card check. A neutral shape task is ready.
